### Overview of This Information Collection

1. *Type of Information Collection:* Reinstatement, with change, of a previously approved collection for which approval has expired.

2. *Title of the Form/Collection:* 2022 Census of Law Enforcement Training Academies (CLETA).

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* The form number is CJ-52. The applicable component within the Department of Justice is the Bureau of Justice Statistics (BJS), in the Office of Justice Programs.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* Respondents will include all state and local law enforcement training academies in the United States that provide basic training to law enforcement recruits.

*Abstract:* BJS has conducted the CLETA regularly since 2002. The 2022 CLETA will be the fifth administration. Historically, the CLETA generates an enumeration of all state and local training academies that provide basic law enforcement training in the United States. The CLETA provides details about the instructors, curricula, resources, and recruits at the approximately 750 training academies operating nationally. The survey asks about the operating entity; resources available to recruits; total operating budget; full-time and part-time instructors or trainers and their education, sworn officer experience, certifications, and ongoing training; sex, race and Hispanic origin, prior educational attainment, and veteran status of recruits starting and completing training; and the length and content of basic training curricula offered at the academy.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* BJS estimates approximately 750 law enforcement academies with a respondent burden of about 2 hours per academy to complete the survey form and about 10 minutes per agency of data quality follow-up time for approximately 450 of those academies.

6. *An estimate of the total public burden (in hours) associated with the collection:* There are an estimated 1,575 total burden hours associated with this information collection.

### Overview of This Information Collection

1. *Type of Information Collection:* Revision of a Currently Approved Collection.

2. *The Title of the Form/Collection:* National Inmate Survey in Prisons (NIS-4P).

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* There is no agency form number at this time. The applicable component within the Department of Justice is the Bureau of Justice Statistics, in the Office of Justice Programs.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* Respondents will primarily be Federal or State Government entities. The work under this clearance will be used to produce estimates for the incidence and prevalence of sexual victimization within correctional facilities as required under the Prison Rape Elimination Act of 2003 (Pub. L. 108-79). The Bureau of Justice Statistics uses this information in published reports and for the U.S. Congress, Executive Office of the President, practitioners, researchers, students, the media, and others interested in criminal justice statistics.

*Abstract:* In 2003, the Prison Rape Elimination Act (PREA or the Act) was signed into law. The Act requires BJS to “carry out, for each calendar year, a comprehensive statistical review and analysis of the incidence and effects of prison rape.” The Act further instructs BJS to collect survey data: “. . . the Bureau shall. . . use surveys and other

statistical studies of current and former inmates. . .”

To implement the Act, BJS developed the National Prison Rape Statistics Program (NPRS), which includes four separate data collection efforts: the Survey on Sexual Violence (SSV), the National Inmate Survey (NIS), the National Survey of Youth in Custody (NSYC), and the National Former Prisoner Survey (NFPS). The NIS collects information on sexual victimization self-reported by inmates held in adult correctional facilities, both prisons and jails. The NIS has been conducted three times, in 2007 (NIS-1), in 2008–09 (NIS-2), and in 2011–12 (NIS-3). Each iteration of NIS was conducted in at least one facility in all 50 states and the District of Columbia. In each iteration of the survey, inmates completed the survey using an audio computer-assisted self-interview (ACASI), whereby they heard questions and instructions via headphones and responded to the survey items via a touch-screen interface.

The collection requested in this notice is the fourth iteration of the National Inmate Survey. For NIS-4, administration of the survey in prisons will take place separately from survey administration in jails. This collection request is specific to conducting the survey in adult prison facilities.

BJS submitted this collection for approval in 2020 in anticipation of fielding the survey in 2021. The survey was delayed due to COVID-19 and fielding is now set to begin in 2023. The collection is slightly modified from the version approved in 2020.

The main difference is a series of edits to items related to sexual orientation and gender identity based on latest recommendations from the National Institute of Health. In addition, revisions have been made to reflect the possibility that a transgender man could be housed in a women’s prison or that a transgender woman could be housed in a men’s prison. In previous rounds of the NIS, respondents were routed through the survey assuming that prisons housed inmates based on anatomy rather than gender identity. We have revised our questions to make sure they are appropriate for all inmates living in a sampled facility. A module on parental involvement has been removed from the survey.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* Prior to data collection commencing in 2023, BJS will coordinate the logistics of NIS-4 survey administration with staff at federal and state correctional facilities. It is

estimated that 241 facility respondents will devote 150 minutes of time to this coordination effort. During data collection in 2023, an estimated 75,674 federal and state prison inmates will be interviewed, with the average interview lasting an estimated 35 minutes.

6. *An estimate of the total public burden (in hours) associated with the collection:* The total estimated NIS-4 in Prisons public burden, inclusive of facility staff and respondent burden estimates and assuming a 100% response rate, is 77,288 hours. This comprises 19,522 hours of facility staff burden (coordinating the administration, completing the facility questionnaire, and escorting inmates to and from the interviews) and 57,766 hours of respondent interviewing burden. The third iteration of NIS had around a 65% response rate, so the true burden will likely be much lower.

*If additional information is required contact:* Robert Houser, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 3E.206, Washington, DC 20530.
