

Because the fuel is already on site and the requested license renewal would only continue to authorize the receipt, possession, inspection, and storage of the fuel, the NRC staff has determined that the proposed action will not affect listed species or critical habitat. Therefore, no further consultation is required under Section 7 of the Endangered Species Act. Likewise, the NRC staff has determined that the proposed action is not the type of activity that has potential to cause effects on historic properties. Therefore, no further consultation is required under Section 106 of the National Historic Preservation Act.

### III. Finding of No Significant Impact

The NRC reviewed the documents submitted by TVA in support of its application for renewal of SNM-2014 for the WBN2 facility, including those incorporated by reference from its part 50 operating license application for the WBN2 facility. The NRC also performed independent assessments, as discussed in the EA, and found no significant environmental impacts from the proposed continued fresh fuel receipt, possession, inspection and storage. On the basis of this EA, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an EIS for the proposed action.
