

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XC144]

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council's Ecosystems and Ocean Planning (EOP) Committee and Advisory Panel will hold a joint public meeting.

DATES: The meeting will be held on Thursday, July 21, 2022, from 10 a.m. to 12 p.m. For agenda details, see

SUPPLEMENTARY INFORMATION.

ADDRESSES: The meeting will be held via webinar. Connection information will be posted to the Council's calendar prior to the meeting at www.mafmc.org.

Council address: Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331; www.mafmc.org.

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526–5255.

SUPPLEMENTARY INFORMATION: The Mid-Atlantic Fishery Management Council's EOP Committee and Advisory Panel will meet together, via webinar on Thursday, July 21, 2022, from 10 a.m. until 12 p.m. The purpose of this meeting is for the EOP Committee and its Advisors to develop comments for Council consideration related to the NOAA proposal to designate the Hudson Canyon as a National Marine Sanctuary.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Shelley Spedden, (302) 526–5251 at least 5 days prior to the meeting date.

Dated: June 29, 2022.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

National Oceanic and Atmospheric Administration

[RTID 0648–XC148]

Threatened Species; Take of Steelhead; Take of Green Sturgeon

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce.

ACTION: Notice of receipt of application; to renew a scientific enhancement permit.

SUMMARY: Notice is hereby given that NMFS received an application from the U.S. Bureau of Reclamation (Reclamation) to renew their U.S. Endangered Species Act (ESA) Section 10(a)(1)(A) scientific enhancement permit (permit 16608–3R) for the San Joaquin River Restoration Program Steelhead Monitoring. Proposed activities within

the permit application are expected to affect the threatened California Central Valley (CCV) Distinct Population Segment (DPS) of steelhead (*Oncorhynchus mykiss*) and the threatened Southern DPS of North American green sturgeon (*Acipenser medirostris*). The public is hereby notified the application for Permit 16608–3R is available for review and comment before NMFS either approves or disapproves the application.

DATES: Written comments on the permit application must be received at the appropriate email address (see **ADDRESSES**) on or before August 4, 2022.

ADDRESSES: Written comments on the permit application should be submitted to NMFS' Section 10(a)(1)(A) steelhead permit coordinator for the San Joaquin River Restoration Program, Ms. Hilary Glenn, via email (hilary.glenn@noaa.gov). The permit application is available for review online at the Authorizations and Permits for Protected Species website: https://apps.nmfs.noaa.gov/preview/preview_open_for_comment.cfm.

FOR FURTHER INFORMATION CONTACT: Ms. Hilary Glenn (email: hilary.glenn@noaa.gov; phone: 916–200–8211).

SUPPLEMENTARY INFORMATION:

Species Covered in This Notice

Threatened California Central Valley Distinct Population Segment of steelhead (*Oncorhynchus mykiss*); Threatened Southern Distinct Population Segment (sDPS) of North American green sturgeon (*Acipenser medirostris*).

Authority

Scientific research and enhancement permits are issued in accordance with Section 10(a)(1)(A) of the ESA (16 U.S.C. 1531 *et. seq*) and regulations governing listed fish and wildlife permits (50 CFR 222–227). NMFS issues permits based on findings that such permits (1) are applied for in good faith, (2) would not operate to the disadvantage of the listed species which are the subject of the permits, and (3) are consistent with the purposes and policies set forth in Section 2 of the ESA. Authority to take listed species is subject to conditions set forth in the permits.

This notice is provided pursuant to Section 10(c) of the ESA. NMFS will evaluate the application, associated documents, and any comment submitted to determine whether the application meets the requirements of Section 10(a) of the ESA and Federal regulations. The final permit decisions will not be made until after the end of

the 30-day comment period and consideration of any comment submitted therein. NMFS will publish notice of the final action on the subject permit application in the **Federal Register**.

Those individuals requesting a hearing on the application listed in this notice should provide the specific reasons why a hearing on the application would be appropriate (see **ADDRESSES**). Such a hearing is held at the discretion of the Assistant Administrator for Fisheries, NOAA.

All statements and opinions contained in the permit action summary are those of the applicant and do not necessarily reflect the views of NMFS.

Permit Application Received

Permit 16608–3R

Reclamation applied to renew their Section 10(a)(1)(A) scientific enhancement permit (Previous Federal Permit/Authorization: 16608–2R) involving continued implementation of the San Joaquin River Restoration Program (SJRRP) Steelhead Monitoring Plan (SMP) in the San Joaquin River Restoration Area. The Restoration Area is 153 miles long (246.23 km), from Friant Dam downstream to the San Joaquin River's confluence with the Merced River. This stretch of river crosses the California counties of Fresno, Madera and Merced. The primary objectives of this effort involve: (1) monitor for adult CCV steelhead in the wetted sections of the San Joaquin River downstream of Mendota Dam (or lower, depending on passage conditions) to the Merced River confluence, (2) relocate CCV steelhead to more suitable habitat downstream of the Merced River confluence, (3) determining the distribution, abundance, size, and age structures of both CCV steelhead and sDPS green sturgeon, and (4) documenting changes in CCV steelhead abundance and distribution in response to fluctuating water conditions. Proposed monitoring activities include: capture (raft-mounted electrofisher), fyke nets with wing walls and fish traps, steelhead-specific trammel nets, hand seines, handling (conducting length measurements, gender identification, tissue and scale collection, assessment of condition, checking for the presence of tags), and Passive Integrated Transponder (PIT) tagging of fish inclusive of steelhead and green sturgeon. Captured CCV steelhead will be transported by tanker truck and released in the San Joaquin River downstream of the Merced River confluence. Recaptured CCV steelhead

will be identified by the presence of a PIT tag.

Field activities for the proposed monitoring effort will occur December 1 through April 30 over the next 5 years (start: 12/01/2022 End: 12/31/2027). The take Reclamation is requesting for this 5-year effort is as follows by each take-action category: (1) non-lethal (seven adults) and lethal (two adults) effects due to collecting, sampling, and transport of live threatened CCV steelhead (natural origin) and non-lethal (seven adults) and lethal (two adults) effects to threatened CCV steelhead of hatchery origin, (2) non-lethal (six adults) and no lethal effects due to capture, handling, and release of live threatened green sturgeon, and (3) non-lethal effects to threatened CCV steelhead of natural origin (ten adults) and threatened CCV steelhead of hatchery origin (ten adults), and threatened sDPS green sturgeon (three adults) due to observations and harassment at weirs, fish ladders, and dams where no trapping occurs. The potential unintentional lethal take resulting from the proposed scientific enhancement activities is up to four adult CCV steelhead (two natural origin; two hatchery origin). Overall, no intentional lethal take of CCV steelhead is proposed or expected as a result of these scientific enhancement activities.

This proposed scientific enhancement effort is expected to provide valuable information on sDPS green sturgeon and the most southern extent of CCV steelhead to the California Department of Fish and Wildlife's comprehensive monitoring plan for steelhead in the Central Valley. The proposed monitoring by Reclamation is consistent with recommendations and objectives outlined in NMFS' Recovery Plan for CCV steelhead. See the application for Permit 16608–3R for greater details on the scientific enhancement proposal and related methodology.

Dated: June 28, 2022.

Angela Somma,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF DEFENSE

Department of the Air Force

Record of Decision for the Environmental Impact Statement T–7A Recapitalization at Joint Base San Antonio-Randolph, TX

AGENCY: Department of the Air Force, Department of Defense.

ACTION: Notice of Availability of Record of Decision.

SUMMARY: On June 21, 2022, the Department of the Air Force (DAF) signed the Record of Decision (ROD) for the T–7A Recapitalization at Joint Base San Antonio (JBSA)-Randolph, TX Environmental Impact Statement.

ADDRESSES: Mr. Nolan Swick, AFCEC/CZN, 2261 Hughes Avenue, Suite 155, JBSA-Lackland Air Force Base, Texas 78236–9853, (210) 925–3392; nolan.swick@us.af.mil.

SUPPLEMENTARY INFORMATION: The DAF has decided to replace all T–38C aircraft at JBSA-Randolph with up to 72 T–7A aircraft and continue flying training programs at JBSA-Randolph. The DAF decision documented in the ROD was based on matters discussed in the Final Environmental Impact Statement, inputs from the public and regulatory agencies, and other relevant factors. The Final Environmental Impact Statement was made available to the public on March 4, 2022 through a Notice of Availability in the **Federal Register** (Volume 87, Number 43, Page 12450) with a waiting period that ended on April 4, 2022.

Authority: This Notice of Availability is published pursuant to the regulations (40 CFR part 1506.6) implementing the provisions of the National Environmental Policy Act (42 U.S.C. 4321, *et seq.*) and the Air Force's Environmental Impact Analysis Process (32 CFR parts 989.21(b) and 989.24(b)(7)).

Adriane Paris,

Air Force Federal Register Liaison Officer.
