Approval and Promulgation of Implementation Plans; Texas; Revision to Control of Air Pollution From Volatile Organic Compounds; Alternative Leak Detection and Repair Work Practice

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a Texas State Implementation Plan (SIP) revision for control of volatile organic compound (VOC) emissions from fugitive sources that was submitted to EPA on July 2, 2010. The SIP revision allows for a voluntary alternative work practice to detect fugitive emission leaks using optical gas imaging instruments under the EPA federal Leak Detection and Repair (LDAR) requirements. The EPA adopted through rulemaking the

use of this voluntary alternative work practice for federal leak detection and repair of fugitive emissions sources. EPA has evaluated the SIP revision and determined that it is consistent with the federal LDAR regulations. EPA is approving this action under Section 110 of the Clean Air Act.

Approval of Other Solid Waste Incinerator Units State Plan for Designated Facilities and Pollutants: Indiana

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve, through direct final procedure, Indiana's State Plan to control air pollutants from "Other Solid Waste Incineration" (OSWI) Units. The Indiana Department of Environmental Management submitted the State Plan on November 27, 2007, following the required public process. The State Plan is consistent with Emission Guidelines promulgated by EPA on December 16, 2005. This approval means that EPA finds that the State Plan meets applicable Clean Air Act requirements for OSWI units for which construction commenced on or before December 4, 2004. Once effective, this approval also makes the State Plan Federally enforceable.

also to FCC Form 323-E, Ownership Report for Non Commercial Broadcast Stations, through the development of a new functionality in the Commission's Registration System (CORES) for issuing FCC Registration Numbers (FRNs). Specifically the Commission seeks comment on a proposal to create a new mechanism for an individual to obtain an FRN that is usable only for broadcast ownership reporting purposes through CORES.

DATES: The Commission must receive written comments on or before March 30, 2015 and reply comments on or before April 13, 2015. Summary

I. Introduction

1. The Commission has a long-standing goal of promoting ownership diversity in broadcast stations to ensure that diverse viewpoints and

perspectives are available to the American people in the content they receive over the broadcast airwaves. In pursuit of this goal, the Commission has a long history of promulgating rules and regulations designed to foster diversity in terms of minority and female ownership. A necessary foundation for the Commission's rulemaking efforts is the collection of comprehensive, reliable data reflecting the race, gender, and ethnicity of the owners and other interest holders in broadcast stations. Such data are essential to study and analyze ownership trends effectively, to assess the impact of Commission rules, and to determine whether rule changes would be in the public interest. To be useful for these purposes, to the greatest extent possible the data must be capable of being read, verified, searched, aggregated, and cross-referenced electronically.

2. As a part of these efforts, the Commission herein proposes improvements to the collection of data reported on FCC Form 323, Ownership Report for Commercial Broadcast Stations, and also to FCC Form 323-E, Ownership Report for Noncommercial Broadcast Stations, through the development of a new functionality in the Commission's Registration System (CORES) for issuing FCC Registration Numbers (FRNs). Specifically, we seek comment on a proposal to create a new mechanism for obtaining an FRN through CORES. Use of this FRN would be restricted to the reporting of individual attributable interest holders in commercial and noncommercial broadcast stations on ownership reports. This "Restricted Use" FRN (RUFN) would be supported by identifying information for attributable individuals that does not include full Social Security Numbers (SSNs) and that would be housed securely on the Commission's servers and not made available to the public. This proposal is intended to address some of the privacy and data security concerns that commenters raised with respect to prior proposals while still enabling the Commission to uniquely identify reported individuals, obtain data reflecting a more useful, accurate, and thorough assessment of minority and female broadcast station ownership in the United States and reduce certain filing burdens. Ultimately, such changes to the Commission's system could assist future initiatives promoting diverse ownership.
