

performed is of acceptable quality and to verify that the correct blocks were visited. If the cluster fails the DQC, then the DQC lister reworks the entire cluster. The completed listing books are keyed for matching against the census Decennial Master Address File for the same areas.

The Independent Listing results will be computer and clerically matched to the Decennial Master Address File from the census in the same areas. As the result of the matching, an additional relisting operation can occur for block clusters having high levels of geocoding errors in the original Independent Listing. The methods and procedures for Relisting will be the same as those for the Independent Listing operation. There will be one Independent Listing Form, DX-1302, that will be used for Independent Listing, DQC, and Relisting.

Definition of Terms

Components of Coverage Error—The two components of census coverage error are census omissions (missed persons or housing units) and erroneous inclusions (persons or housing units enumerated in the census that should not have been). Examples of erroneous inclusions are: housing units built after Census Day and persons or housing units enumerated more than once (duplicates).

Net Coverage Error—Reflects the difference between census omissions and erroneous inclusions. A positive net error indicates an undercount, while a negative net error indicates an overcount.

Affected Public: Individuals or households.
