Privacy Act of 1974, as Amended; Revisions to Existing System of Records

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed revisions to an existing system of records.

SUMMARY: The Nuclear Regulatory Commission (NRC) is issuing public notice of its intent to modify an existing system of records, NRC-20, "Official Travel Records—NRC," to incorporate the collection and use of travel charge card records, including credit data, to comply with the Consolidated Appropriations Act, 2005 (Pub. L. 108-447).

DATES: The revised system of records will become effective without further notice on January 30, 2006 unless comments received on or before that date cause a contrary decision. If changes are made based on NRC's review of comments received, a new final notice will be published.

ADDRESSES: Comments may be provided to the Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Written comments should also be transmitted to the Chief of the Rules and Directives Branch, either by means of facsimile transmission to (301) 415-5144, or by e-mail to nrcrcp@nrc.gov.

SUPPLEMENTARY INFORMATION: NRC is proposing to add new categories of records in the system to include charge card applications, terms and conditions for use of charge cards, charge card training documentation, monthly reports regarding accounts, credit data, and related documentation; update the authority for the system by adding Section 639 of the Consolidated Appropriations Act, 2005 (Pub.L. 108-447); and incorporate three new routine uses which will allow disclosure of information to the charge card issuing bank, the Department of Interior, National Business Center, to collect severe travel card delinquencies by employee salary offset, and to a consumer reporting agency to obtain credit reports.

A report on the proposed revisions is being sent to OMB, the Committee on Homeland Security and Governmental Affairs of the U.S. Senate, and the Committee on Government Reform of the U.S. House of Representatives as required by the Privacy Act and OMB Circular No. A-130, Appendix I, "Federal Agency Responsibilities for Maintaining Records About Individuals." NUCLEAR REGULATORY COMMISSION

Availability of and Solicitation of Public Comments on Report on Seismic Considerations for the Transition Break Size

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of opportunity for public comment.

SUMMARY: On November 7, 2005, the Nuclear Regulatory Commission (NRC) published for public comment a proposed rule in the **Federal Register** (70 FR 67598) on Risk-Informed Changes to Loss-of-Coolant Accident Technical Requirements. Under the proposed § 50.46a rule, nuclear power plant licensees would be allowed to implement a voluntary, risk-informed alternative to the current requirements for analyzing the performance of emergency core cooling systems (ECCS) during loss-of-coolant accidents (LOCAs). In addition, the proposed rule would establish procedures and criteria for requesting changes in plant design and procedures based upon the results of the new analyses of ECCS performance during LOCAs. In the **Federal Register** notice associated with the publication of the proposed alternative § 50.46a rule, the Commission noted that the potential for seismically-induced pipe breaks was not considered in determining the area of the transition break sizes¹ (TBSs). The Commission stated that work was ongoing to investigate the possible effect of seismically-induced pipe breaks on the TBS selections and committed to put a report on the NRC Web site to facilitate public comment on the technical aspects of the issue. The NRC staff has completed its report and has posted it on the Rulemaking Forum Web site, <http://ruleforum.llnl.gov>.

DATES: Comment period expires on February 6, 2006. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given to comments received after this date.

¹ Different values for TBS were specified for PWRs and BWRs.
