Title of Collection: 2023–2024 Free Application for Federal Student Aid.

OMB Control Number: 1845–0001.

Type of Review: A revision of a currently approved collection.

Respondents/Affected Public: Individuals and Households.

Total Estimated Number of Annual Responses: 33,962,310.

Total Estimated Number of Annual Burden Hours: 22,844,712.

Abstract: Section 483, of the Higher Education Act of 1965, as amended (HEA), mandates that the Secretary of Education “. . . shall produce, distribute, and process free of charge common financial reporting forms as described in this subsection to be used for application and reapplication to determine the need and eligibility of a student for financial assistance. . . .”

The determination of need and eligibility are for the following Title IV, HEA, federal student financial

assistance programs: The Federal Pell Grant Program; the Campus-Based programs (Federal Supplemental Educational Opportunity Grant (FSEOG) and Federal Work-Study (FWS)); the William D. Ford Federal Direct Loan (Direct Loan) Program; the Teacher Education Assistance for College and Higher Education (TEACH) Grant; the Children of Fallen Heroes Scholarship; and the Iraq and Afghanistan Service Grant.

Federal Student Aid (FSA), an office of the U.S. Department of Education, subsequently developed an application process to collect and process the data necessary to determine a student's eligibility to receive Title IV, HEA program assistance. The application process involves an applicant's submission of the Free Application for Federal Student Aid (FAFSA®). After submission and processing of the FAFSA form, an applicant receives a Student Aid Report (SAR), which is a summary of the processed data they submitted on the FAFSA form. The applicant reviews the SAR, and, if necessary, will make corrections or updates to their submitted FAFSA data. Institutions of higher education listed by the applicant on the FAFSA form also receive a summary of processed data submitted on the FAFSA form which is called the Institutional Student Information Record (ISIR).

ED and FSA seek OMB approval of all application components as a single “collection of information.” The aggregate burden will be accounted for under OMB Control Number 1845–0001. The specific application components, descriptions, and submission methods for each are listed in Table 1.

Correcting Submitted FAFSA Information and Reviewing FAFSA Information		
<i>fafsa.gov</i> —Corrections	Any applicant who has a Federal Student Aid ID (FSA ID)—regardless of how they originally applied—may make corrections.	Submitted by the applicant.

Notification for the eSAR is sent to students who applied electronically or by paper and provided a valid e-mail address. These notifications are sent by e-mail and include a secure hyperlink that takes the user to the <i>fafsa.gov</i> site.	Cannot be submitted for processing.
SAR Acknowledgement	The SAR Acknowledgement is a condensed paper SAR that is mailed to applicants who applied electronically but did not provide a valid e-mail address.	Cannot be submitted for processing.

This information collection also documents an estimate of the annual public burden as it relates to the application process for federal student aid. The Applicant Burden Model (ABM) measures applicant burden through an assessment of the activities each applicant conducts in conjunction with other applicant characteristics and, in terms of burden, the average applicant's experience. Key determinants of the ABM include:

- The total number of applicants that will potentially apply for federal student aid;
- How the applicant chooses to complete and submit the FAFSA form (e.g., by paper or electronically);
- How the applicant chooses to submit any corrections and/or updates (e.g., the paper SAR or electronically);
- The type of SAR document the applicant receives (eSAR, SAR acknowledgment, or paper SAR);
- The formula applied to determine the applicant's expected family contribution (EFC) (full need analysis formula, Simplified Needs Test or Automatic Zero); and
- The average amount of time involved in preparing to complete the application.

The ABM is largely driven by the number of potential applicants for the application cycle. The total application projection for 2023–2024 is based on the projected total enrollment into post-secondary education for Fall 2023. The

ABM is also based on the application options available to students and parents. ED accounts for each application component based on analytical tools, survey information and other ED data sources.

For 2023–2024, ED is reporting a net burden decrease of 3,466,325 hours.

Dated: February 17, 2022.

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.
