SUPPLEMENTARY INFORMATION:

AmeriCorps Volunteer Generation Study

I. Background

The three AmeriCorps programs of the Corporation (AmeriCorps*State/National, National Civilian Community Corps (NCCC) and Volunteers In Service To America (VISTA)) depend on volunteers to help link program activities to individuals and institutions in the communities served by AmeriCorps. Each program plans and implements its own volunteer

mobilization and deployment strategies. Volunteer mobilization includes volunteer position development, recruitment, screening, and training. Deployment includes management (i.e. placement, scheduling, coordination, record keeping, volunteer/paid staff relations), recognition and development of appropriate volunteer policies and procedures.

II. Current Action

The Corporation seeks to evaluate the volunteer mobilization and deployment practices and outcomes of AmeriCorps programs. The evaluation will determine the extent to which the mobilization and deployment of local volunteers is meeting AmeriCorps goals for community strengthening and getting things done and AmeriCorps programs are engaging in effective volunteer mobilization and deployment practices. The evaluation will entail mail survey of approximately 1500 surveys to program/project directors and/or site staff. The Corporation will use the data collected through these activities to help programs and projects improve their volunteer-related practices.

Title: Defense Suppliers Customer Satisfaction Diagnostic Survey.

Needs and Uses: The information collection is necessary to determine the reasons for supplier satisfaction/dissatisfaction with Defense acquisition processes. The information will be used to improve Defense acquisition processes to assure supplier satisfaction. *Affected Public:* Business or other for profit.

Annual Burden Hours: 95.

Number of Respondents: 380.

Responses per Respondent: 1.

Average Burden per Response: 15 minutes.

Frequency: Annually.

SUPPLEMENTARY INFORMATION:**Summary of the Information Collection**

DoD has identified three activities that interface with its suppliers and are relevant for acquisition improvement. These are providing information that contractors need to do business with DoD, establishing a business relationship with each contractor, and then maintaining that business relationship on a long-term basis. The best leverage for improving the overall satisfaction of suppliers is in improving the relationships DoD maintains with them. The proposed collection has been designed to diagnose problems with supplier customer satisfaction. This feedback will be used to formulate policies, programs and practices for improving the level of supplier customer satisfaction. A web-based survey is planned for the supplier diagnostic survey. The survey instrument will be posted on the web, and suppliers will be sent invitations via e-mail to access the web site and complete the survey instrument. The basis for this method is that the cost and time for the survey could be reduced, minimizing the burden on the supplier base.
