Airworthiness Directives; BAE Systems (Operations) Limited Model ATP Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule; request for comments.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all BAE Systems (Operations) Limited Model ATP airplanes. This AD requires

repetitive inspections for environmental damage, including corrosion, of the fuselage and wing structure, and corrective actions if necessary. This AD results from information indicating the potential for environmental damage of the fuselage and wing structure. We are issuing this AD to detect and correct such damage, including corrosion, in the fuselage and wing structure, which could result in cracking and consequent reduced structural integrity of the fuselage and wing structure.

DATES: This AD becomes effective October 21, 2005.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in the AD as of October 21, 2005.

We must receive comments on this AD by December 5, 2005.

Discussion

The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, notified us that an unsafe condition may exist on all BAE Systems (Operations) Limited Model ATP airplanes. The CAA advises that there is a potential for environmental damage of the fuselage and wing structure. New inspections for environmental damage were added to the ATP Maintenance Review Board
