SUPPLEMENTARY INFORMATION:

Title: West Indian Fruit Fly.

OMB Number: 0579-0170.

Type of Request: Extension of approval of an information collection.

Abstract: The Plant Protection Act (7 U.S.C. 7701-7772) authorizes the Secretary of Agriculture, either independently or in cooperation with States, to carry out operations or measures to detect, eradicate, suppress, control, prevent, or retard the spread of plant pests, such as West Indian fruit fly, that are new to or not widely distributed within the United States.

The West Indian fruit fly, *Anastrepha obliqua* (Macquart), is a very destructive pest of fruits and vegetables, including carambola, grapefruit, guava, limes, mangoes, oranges, passion fruit, peaches, and pears. This pest can cause serious economic losses by lowering the yield and quality of these fruits and vegetables and, in some cases, by damaging seedlings and young plants. Heavy infestations can result in complete loss of these crops.

Regulations in 7 CFR 301.98 through 301.98-10 restrict the interstate movement of regulated articles from quarantined areas to prevent the spread of the West Indian fruit fly to noninfested areas of the United States and require the use of certain information collection activities in the form of certificates or limited permits and compliance agreements.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as

affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 1 hour per response.

Respondents: State and county cooperators (inspectors) and producers, handlers, and movers of regulated fruit and vegetables.

Estimated annual number of respondents: 37.

Estimated annual number of responses per respondent: 1.

Estimated annual number of responses: 37.

Estimated total annual burden on respondents: 37 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 9th day of April 2004.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

SUPPLEMENTARY INFORMATION:

Title: West Nile Virus Surveillance Project.

OMB Number: 0579-0162.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal and Plant Health Inspection Service of the U.S. Department of Agriculture regulates the importation and interstate movement of animals and animal products, and conducts various other activities to protect the health of our Nation's livestock and poultry. Disease surveillance plays an important role in protecting the health of the U.S. livestock and poultry populations.

One such surveillance program gathers information concerning outbreaks of West Nile virus (WNV) in the United States. WNV, although not considered to be a national epidemic, has potential to cause economic harm to the U.S. equine industry due to possible trade restrictions that could be imposed by other countries. The goal of the WNV surveillance project is to collect data from equine owners and to analyze this data to explain equine or premises risk factors for WNV infection.

Gathering this data entails the use of two information collection activities in the form of an owner/operator agreement to participate in the survey and a WNV data collection form.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning this information collection activity. These comments will help us:

(1) Evaluate whether the information collection is necessary for the proper performance of our agency's functions, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of

information is estimated to average 1.125 hours per response.

Respondents: Equine owners.

Estimated annual number of respondents: 420.

Estimated annual number of responses per respondent: 2.

Estimated annual number of responses: 840.

Estimated total annual burden on respondents: 945 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.
