

not suggest that exporters receive more in drawback than the amount to which they are entitled. Thus, petitioners have not provided sufficient information to support their allegation that there is a benefit to exporters under Argentina's duty drawback regime, and we are not including this program in our initiation.

### 3. Regional Promotional Scheme—Reimbursement "Patagonico": Reimbursement of Argentine National Income Tax

Petitioners allege that the GOA administers a regional promotion scheme for the Patagonian region (La Pampa, Rio Negro, Neuquen, Chubut, Santa Cruz, the National Territory of Tierra del Fuego, the Antarctic, the Falkland Islands and part of the Patagonian region located in the Province of Buenos Aires). According to petitioners, pursuant to Law 2,333/83, the GOA offers reimbursement of national income taxes to companies in the named region.

Petitioners have provided information supporting their allegation of import duty exemptions for capital goods under this program (*See* section I.J. above). However, petitioners have not provided information establishing that there is also an income tax reimbursement program under this regional promotion scheme. Therefore, we are not including this program in our initiation.

#### *Distribution of Copies of the Petitions*

In accordance with section 702(b)(4)(A)(i) of the Act, copies of the public version of the petition have been provided to the representatives of Argentina. We will attempt to provide copies of the public version of the petition to all the exporters named in the petition, as provided for under section 351.203(c)(2) of the Department's regulations.

#### *ITC Notification*

Pursuant to section 702(d) of the Act, we will notify the ITC of this initiation.

#### *Preliminary Determination by the ITC*

The ITC will determine by November 20, 2000, whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, by reason of imports of honey from Argentina. A negative ITC determination will result in the investigation being terminated; otherwise, the investigation will proceed according to statutory and regulatory time limits.

This notice is published pursuant to section 777(i) of the Act.

Dated: October 26, 2000.

## DEPARTMENT OF COMMERCE

### National Institute of Standards and Technology

#### Notice of Government Owned Inventions Available for Leasing

**AGENCY:** National Institute of Standards and Technology, Commerce.

**ACTION:** Notice of government owned inventions available for licensing.

**SUMMARY:** The inventions listed below are owned in whole or in part by the U.S. Government, as represented by the Department of Commerce. The Department of Commerce's interest in the inventions is available for licensing in accordance with 35 U.S.C. 207 and 37 CFR Part 404 to achieve expeditious commercialization of results of federally funded research and development.

#### **FOR FURTHER INFORMATION CONTACT:**

Technical and licensing information on these inventions may be obtained by writing to: National Institute of Standards and Technology, Office of Technology Partnerships, Building 820, Room 213, Gaithersburg, MD 20899; Fax 301-869-2751. Any request for information should include the NIST Docket No. and Title for the relevant invention as indicated below.

**SUPPLEMENTARY INFORMATION:** NIST may enter into a Cooperative Research and Development Agreement ("CRADA") with the licensee to perform further research on the inventions for purposes of commercialization. The inventions available for licensing are:

*NIST Docket Number:* 98-032US.

*Title:* Method of Manufacture of Convective Accelerometers

*Abstract:* This invention is jointly owned by the Department of Commerce and RF Microsystems. The Department's interest in the invention is available for licensing. A gamma radiation sensing device is described which can be used to create a detailed three dimensional intensity distribution of a high radiation zone and to map the radiation intensity as a registered color contour field of a three dimensional geometric model of the radiation zone. The device consists of two mated hemispheres fabricated from material with high-gamma blocking capability. The hemispheres contain an offset mating surface that precludes the mating surface

functioning as a radiation channel to the center of the mated sphere. A small-bore linear collimation channel is machined into each hemisphere to create a single, narrow bore viewing path to a central radiation sensing means located at the core of the sphere. The sensing element (an ionization probe, scintillator, or similar radiation sensitive means) is positioned so that it is at the terminus of the radiation channel. A circuitous path means machined into the hemisphere mating surfaces carries the signal (through the use of a flexible cable means—either coaxial or fiber optic) from the sensor to a remote electronic diagnostic and data logging means located well outside the high radiation environment. The circuitous path serves to restrict direct radiation entry to the sensor from all sources except those in line-of-sight with the collimated radiation channel.

Dated: October 23, 2000.

### National Oceanic and Atmospheric Administration

[I.D. 103000A]

#### Atlantic Sea Scallop Fishery Management Plan Framework Adjustment 14

**AGENCY:** National Oceanic and Atmospheric Administration (NOAA).

**ACTION:** Proposed collection; Comment request.

**SUMMARY:** The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)).

**DATES:** Written comments must be submitted on or before January 2, 2001.

**ADDRESSES:** Direct all written comments to Madeleine Clayton, Departmental Forms Clearance Officer, Department of Commerce, Room 6086, 14th and Constitution Avenue NW, Washington DC 20230 (or via Internet at MClayton@doc.gov).

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information or
