POLICY JUSTIFICATION**Egypt – 120mm Armor Piercing Fin Stabilized Discarding Sabot-Tracer Kinetic Energy Tungsten Advanced Cartridges**

The Government of Egypt has requested a possible sale of 10,040 non-standard rounds of commercial 120mm Armor Piercing Fin Stabilized Discarding Sabot-Tracer (APFSDS-T) Kinetic Energy Tungsten Advanced cartridges, fire control solution, and program management. The estimated cost is \$54 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country which has been and continues to be an important force for political stability and economic progress in the Middle East.

This proposed sale would provide Egypt with additional combat ammunition to support its M1A1 Abrams Tank fleet. Egypt will have no difficulty absorbing these cartridges into its armed forces.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be General Dynamics Ordnance and Tactical Systems of St. Petersburg, Florida. There are no offset agreements proposed in connection with this potential sale.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor representatives to Egypt.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 03-27**Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act****Annex
Item No. vii****(vii) Sensitivity of Technology:**

1. **The commercial of 120mm Armor Piercing Fin Stabilized Discarding Sabot-Tracer (APFSDS-T) Kinetic Energy Tungsten Advanced cartridges components are Unclassified. The capabilities of these cartridges, to include the terminal effects, target impact dispersion, and armor defeating capabilities, are classified Confidential, except for armor penetration test results against Special Armored Targets, which are classified Secret or the same level of classification as the target, whichever is greater. The tungsten processing and penetrator manufacturing methods are sensitive data. No technological information regarding the tungsten penetrator material will be supplied with the cartridges being considered for foreign military sales. Overall degree of sensitivity is high. This is a commercially developed item and is not warranted by the U.S. Government.**

2. **A determination has been made that Egypt can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.**
