

Title: Grade Crossing Signal System Safety Regulations.

OMB Control Number: 2130-0534.

Abstract: FRA believes that highway-rail grade crossing (grade crossing) accidents resulting from warning system failures can be reduced when railroads take certain actions, as required by FRA's regulations, in the event of an activation failure.¹ These required actions are set forth in 49 CFR part 234. An activation failure is defined as when a grade crossing warning system fails to indicate the approach of a train at least 20 seconds prior to the train's arrival at the crossing or to indicate the presence of a train occupying the crossing. Specifically, railroads must report to FRA every impact between on-track

railroad equipment and an automobile, bus, truck, motorcycle, bicycle, farm vehicle, or pedestrian at a highway-rail grade crossing involving a crossing warning system activation failure. Notification must be provided to the National Response Center within 24 hours of occurrence at the stipulated toll-free telephone number. Additionally, railroads must report to FRA within 15 days of each activation failure of a highway-rail grade crossing warning system. Form FRA F 6180.83, "Highway-Rail Grade Crossing Warning System Activation Failure Report," must be used for this purpose and completed using the instructions printed on the form. With this

information, FRA can identify the causes of activation failures and investigate them to determine whether periodic maintenance, inspection, and testing standards are effective.

In this 60-day notice, FRA made no adjustments to the previously approved burden hours.

Title: 49 U.S.C. Section 5337 State of Good Repair Program.

OMB Number: 2132-0577.

Background: 49 U.S.C. 5337, the State of Good Repair Grants Program authorizes the Secretary of Transportation to make grants to designated recipients to maintain, replace, and rehabilitate high intensity fixed guideway systems and high intensity motorbus systems in a state of good repair. Projects that are eligible for the State of Good Repair Program funds

must be in a recipient's Transit Asset Management plan. Eligible recipients include state and local governmental authorities in urbanized areas with high intensity fixed guideway systems and/or high intensity motorbus systems operating for at least seven years. Projects are funded at 80 percent federal with a 20 percent local match requirement by statute. FTA will apportion funds to designated recipients. The designated recipients will then allocate funds as appropriate to recipients that are public entities in the urbanized areas. FTA can make grants to direct recipients after sub-allocation of funds. Recipients apply for grants electronically, and FTA collects milestone and financial status reports from designated recipients on a quarterly basis. The Competitive Rail Vehicle Replacement Grant (Rail Program) is a discretionary grant program to assist in funding the replacement of rail rolling stock. The Rail Program (49 U.S.C. 5337(f)) a set-aside of the State of Good Repair Formula Grants Program (49 U.S.C. 5337).

The information submitted ensures FTA's compliance with applicable federal laws.

Respondents: States and local governmental authorities.

Estimated Annual Number of Responses: 1,097.

Estimated Total Respondents: 68.

Estimated Total Annual Burden: 13,729 hours

Frequency: Annual.
