SUPPLEMENTARY INFORMATION: The U.S. Department of Energy (DOE) published a proposed determination that commercial and industrial fans and blowers (fans) meet the definition of covered equipment under the Energy Policy and Conservation Act of 1975, as amended (76 FR 37628, June 28, 2011). As part of its further consideration of this determination, DOE is analyzing potential energy conservation standards for fans. DOE published a notice of public meeting and availability of the framework document to consider such standards (78 FR 7306, Feb. 1, 2013). The framework document requested public comment from interested parties and provided for the submission of comments by March 18, 2013. Thereafter, Air Movement and Control

Association International (AMCA), on behalf of itself and its affiliates, requested an extension of the public comment period by 45 days. AMCA stated that the additional time is necessary to conduct a rapid and intensive research project in order to provide DOE with better information at an early stage of the regulatory process, making subsequent phases more efficient and effective.

Based on AMCA's request, DOE believes that extending the comment period to allow additional time for interested parties to submit comments is appropriate. Therefore, DOE is extending the comment period until May 2, 2013 to provide interested parties additional time to prepare and submit comments. Accordingly, DOE will consider any comments received by May 2, 2013 to be timely submitted.

Issued in Washington, DC, on February 12, 2013.

Kathleen B. Hogan,

Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.
