SUPPLEMENTARY INFORMATION:

Note: In this document, "we," "us" and "our" refer to EPA.

Today's notice is an announcement of a finding that we have already made. On February 14, 2002, EPA Region IX sent a letter to the California Air Resources Board (CARB), stating that motor vehicle emission budgets in the San Francisco Bay Area Ozone Attainment Plan for the 1-Hour National Ozone Standard (revised September 2001 and submitted by CARB on November 30, 2001) are adequate for transportation conformity purposes. These budgets are for the year 2006 and are 164.0 tons per day of volatile organic compounds (VOC) and 270.3 tons per day of nitrogen oxides (NO_x).

Transportation conformity is required by section 176(c) of the Clean Air Act (CAA). Our conformity rule requires that transportation plans, programs, and projects conform to state air quality implementation plans (SIPs) and establishes the criteria and procedures for determining whether or not they do. Conformity to a SIP means that transportation activities will not cause new air quality violations, worsen existing violations, or delay timely attainment of the national ambient air quality standards.

The criteria by which we determine whether a SIP's motor vehicle emission budgets are adequate for conformity purposes are outlined in 40 CFR 93.118(e)(4). An adequacy review is separate from the SIP completeness review required by CAA section 110(k)(1). In addition, it should not be used to prejudice our ultimate action on the SIP. Even when we find budgets in a SIP adequate for transportation conformity purposes, we may still later disapprove the SIP.

We have described our process for determining the adequacy of submitted SIP budgets in guidance (May 14, 1999 memo titled "Conformity Guidance on Implementation of March 2, 1999 Conformity Court Decision"). We followed this guidance in making our adequacy determination.

Dated: February 14, 2002.

Wayne Nastri,

Regional Administrator, Region IX.

Inventory of U.S. Greenhouse Gas Emissions and Sinks: 1990-2000

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of documents availability and request for public comments.

SUMMARY: The Draft Inventory of U.S. Greenhouse Gas Emissions and Sinks: 1990-2000 is available for public review. Annual U.S. emissions for the period of time from 1990-2000 are summarized and presented by source category and sector. The inventory contains estimates of carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), hydrofluorocarbons (HFC), perfluorocarbons (PFC), and sulfur hexafluoride (SF₆) emissions. The inventory includes estimates of carbon sequestration in U.S. forests and, new this year, an updated assessment of emissions from the electric power industry. The technical approach used in this report to estimate emissions and sinks for greenhouse gases is consistent with the methodologies recommended by the Intergovernmental Panel on Climate Change (IPCC) and reported in a format consistent with the United Nations Framework Convention on Climate Change (UNFCCC) reporting guidelines. The Inventory of U.S. Greenhouse Gas Emissions and Sinks is the latest in a series of annual U.S. submissions to the Secretariat of the UNFCCC.
