The proposed transmission line would extend along the north side of the White River eastward nine miles from Lock and Dam No. 3 to the proposed substation. Single pole structures would be used to construct the 25 kV transmission line.

The proposed substation would be located approximately two miles east of White River Lock and Dam No. 2 (Project No. 4660), on the north side of the White River. The 100 ft by 150 ft substation would step-up the voltage from 25 kV to 161 kV, and have a transformer rating of 17.5 kV.
