SUPPLEMENTARY INFORMATION:

Title: Data Acquisition for Anticipated Residue and Percent of Crop Treated.

Abstract: Under this ICR, EPA will issue a DCI to affected registrants under the authority of FIFRA section 3(c)(2)(B). Currently, there are two main categories of applications subject to this collection: those requiring submission of a full complement of supporting data, (e.g., new chemicals, and biorationals); and those requiring submission of little or no data, (e.g., "me-too" products) for previously registered chemicals and use patterns. Applicants for a "me-too" product (*i.e.*, a pesticide claimed to be substantially similar in composition and use to a product previously registered by the EPA) may be required only to use EPA Form 8570-34 ("Certification with Respect to Citation of Data") and EPA Form 8570-35 ("Data Matrix") to certify that the applicant intends to rely on data previously submitted to the EPA by another producer, the applicant has contacted the appropriate company (owning the data that the applicant is referencing), and the applicant has offered to pay reasonable compensation for the use of the data.

If EPA relies on ARs data when establishing or reassessing a tolerance, it must issue a DCI, and if the EPA used the percent of crop treated data estimates for a tolerance action, it may issue a DCI. A DCI is a letter sent to the registrant explaining the data submission requirement, requests specific data, sets out a time frame for a response to EPA, and provides applicable forms and guidelines to assist the registrant with the completion of the DCI request. A registrant must respond within 90 days of receipt of the DCI. The response must describe plans to submit the required data in accordance with time frame specified, and, if applicable, contain suggested protocols for monitoring studies. Failure to generate the requested data, or respond to the DCI in a timely manner could result in Agency action to modify or revoke the tolerance.
