History and Description of the Remains

More than 20 years ago, human remains representing, at minimum, three individuals were removed from unknown location(s) in Colorado. The human remains consist of a cranium, partial mandible, and partial left fibula. Based on analysis by Diane France of the Human Identification Laboratory of Colorado, the human remains are Native American. No known individuals were identified. No associated funerary objects are present.

Determinations Made by the Colorado Bureau of Investigation

Officials of the Colorado Bureau of Investigation have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice are Native American.
- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of three individuals of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and any present-day Indian Tribe.
- According to final judgments of the Indian Claims Commission or the Court of Federal Claims, the land from which the Native American human remains were removed is the aboriginal land of The Invited and Consulted Tribes.
- Treaties, Acts of Congress, or Executive Orders indicate that the land from which the Native American human

remains were removed is the aboriginal land of The Invited and Consulted Tribes.

- Pursuant to 43 CFR 10.11(c)(1), the disposition of the human remains may be to The Invited and Consulted Tribes.

Additional Requestors and Disposition

Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Greg Hake, Colorado Bureau of Investigation, 6000 W 54th Avenue, Arvada, CO 80002, telephone (303) 463-7050, email greg.hake@state.co.us, by May 17, 2021. After that date, if no additional requestors have come forward, transfer of control of the human remains to the Invited and Consulted Tribes may proceed. The Southern Ute Tribe and Ute Mountain Ute Tribe have agreed to accept disposition.

The Colorado Bureau of Investigation is responsible for notifying The Invited and Consulted Tribes that this notice has been published.

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and associated funerary objects under the control of Temple University, Philadelphia, PA. The human remains and associated funerary objects were removed from the Abbott Farm National Historical Landmark, Mercer County, NJ.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the Temple University professional staff in consultation with representatives of the Delaware Nation, Oklahoma; Delaware Tribe of Indians; and the Stockbridge-Munsee Community, Wisconsin (hereafter referred to as "The Tribes").

History and Description of the Remains

Between 1963 and 1964, human remains representing, at minimum, eight individuals were removed from present-day Abbott Farm National Historical District (AFNHD) in Mercer County, NJ, by avocational archeologist Andrew Stanzeski. Stanzeski's excavations were part of a larger project led by Janet Pollack near the Watson House, which was located on Rowan Farm, now part of the AFNHD. Stanzeski gave these burials and associated funerary objects to the Temple Anthropology Laboratory and Museum at an unknown date. Eight sets

of human remains were recovered from five separate burials. The human remains belong to three adult males, two adult females, one child less than 39 months of age, and one child approximately 5 years of age, and one individual of unknown age and sex. No known individuals were identified. The nine associated funerary objects are: Two lots of faunal remains, one lot of worked stone flakes, two lots of incised coarse earthenware, three worked stones (two black, one red), and one individual incised earthenware sherd.

The AFNHD is located on the Delaware River flood basin and terrace along Watson's Creek, about 3 miles south of Trenton, in Hamilton Township, Mercer County, NJ. The site was periodically occupied from the Archaic period to the present, but the assemblage of human skeletal remains at Temple University dates to the Late Woodland period (A.D. 900-1600). According to the original excavation notes, the remains of the eight individuals started to appear around 38-46 centimeters below the surface, beneath the second humus layer.

Based on geographic, ethnographic, and historic information, the AFNHD lies within the territory of the Delaware Tribes. The archeological evidence provided by the site is consistent with the use of the area by the Delaware Tribes and demonstrates cultural continuity throughout the Woodland period. In addition, linguistic, folkloric, and oral traditional information show a relationship of shared group identity between the Delaware Tribes and the earlier Woodland Period group, as well as established kinship ties between the members of the Delaware Tribes and the 17th/18th century Delaware residents of the Abbott Farm vicinity.

Determinations Made by Temple University

Officials of Temple University have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of eight individuals of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(3)(A), the nine objects described in this notice are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects and The Tribes.

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request with information in support of the request to Leslie Reeder-Myers, Temple University, 1115 Polett Walk, Gladfelter Hall Room 204, Philadelphia, PA 19122, telephone (215) 204-1418, email leslie.reeder-myers@temple.edu, by May 17, 2021. After that date, if no additional requestors have come forward, transfer of control of the human remains and associated funerary objects to The Tribes may proceed.

Temple University is responsible for notifying The Tribes that this notice has been published.
