### I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

### II. Petition for Modification

*Docket Number:* M–2025–013–C.

*Petitioner:* Signal Peak Energy, LLC, 100 Portal Dr., Roundup, MT 59072.

*Mine:* Bull Mountains Mine No. 1, MSHA ID No. 24–01950, located in Musselshell County, Montana.

*Regulation Affected:* 30 CFR 75.1002(a), Permissible electric equipment.

*Modification Request:* The petitioner requests a modification of the application of 30 CFR 75.1002(a) to allow the use of an alternative method of respirable dust protection. Specifically, the petitioner is seeking modification of the existing standard to permit usage of Dräger X-plore 8700 Powered Air Purifying Respirators (PAPRs) to be used within 150 feet of pillar workings or longwall faces to protect miners from respirable dust.

The petitioner states that:

(a) The petitioner currently utilizes 3M Versaflo TR–800 PAPRs, that were approved for use under a previous petition. The company's request to utilize Dräger units seeks to leverage its improved performance, battery life, durability, and air volume capacity to provide employees with the best protection available.
