

with the United States District Court for the Southern District of Indiana, Indianapolis Division, on November 27, 2000, pertaining to the Dow Chemical Site (the "Site"), located near Zionsville, in Boone County, Indiana. The proposed consent decree would resolve certain civil claims of the United States and the State of Indiana against The Dow Chemical Company ("Dow") under Section 107 of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended ("CERCLA"), 42 U.S.C. 9607, for damages for injury to, destruction of, or loss of natural resources resulting from releases of hazardous substances from the Site.

Under the proposed consent decree, Dow would donate an uncontaminated northern portion of the Site—comprising approximately 17 acres of floodplain habitat along Eagle Creek—to the Zionsville Park and Recreation Board (an agency of the Town of Zionsville, Indiana) for the purpose of restoration, replacement, or protection of natural resources similar to those found on other portions of the Site damaged by releases and threatened releases of hazardous substances. Pursuant to a conservation easement and declaration of restrictive covenants enforceable by the State of Indiana's Department of Natural Resources, the Eagle Creek property would be preserved in perpetuity for specified conservation—and recreation-related purposes.
