Rural Utilities Service

Title: The Rural eConnectivity Pilot Program (ReConnect Program).

OMB Control Number: 0572-0152.

Summary of Collection: Pursuant to the Pilot Program authorization in the Consolidated Appropriations Act, 2018, Public Law 115-141, 779 (2018), RUS is to conduct a pilot broadband program under the RE Act. Under Section 601(d)(1) of the RE Act applicants are required to submit an application for loans and loan guarantees containing the information that the Secretary shall require, and that the project meet the minimum level of broadband in the service area. Section 601(d)(8) sets out the all of the reporting requirements, and the Pilot Program specifically requires that the Section 601(d)(8) reporting requirements be followed. Additionally, Section 601(h) requires that the Secretary ensure the security of any loan or guarantee.

Need And Use of the Information: On March 23, 2018, Congress passed the Consolidated Appropriations Act 2018 (the FY2018 Appropriations) (Pub. L. 115-141) which established a broadband loan and grant pilot program, the Rural eConnectivity Pilot Program (hereinafter the ReConnect Program). One of the essential goals of the ReConnect Program is to expand broadband service to rural areas without sufficient access to broadband, defined as 10 megabits per second (Mbps) downstream and 1 Mbps upstream. For this purpose, Congress provided RUS with \$600 million and expanded its existing authority to make loans and grants. Loans and grants are limited to the costs of the construction, improvement, and acquisition of facilities and equipment for broadband service in eligible communities. The FY2018 Appropriations also authorized technical assistance to assist the agency in expanding needed service to the most rural communities.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR part 94 (referred to below as the regulations) govern the importation of certain animals and animal products into the United States in order to prevent the introduction of various animal diseases, including highly pathogenic avian influenza (HPAI) and Newcastle disease. Within

part 94, § 94.6 contains requirements governing the importation of carcasses, meat, parts or products of carcasses, and eggs (other than hatching eggs) of poultry, game birds, or other birds from regions where HPAI and Newcastle disease is considered to exist.

In accordance with § 94.6(a)(1)(i) the Animal and Plant Health Inspection Service (APHIS) maintains a list of regions in which Newcastle disease is not considered to exist. Paragraph (a)(1)(ii) states that APHIS will add a region to this list after it conducts an evaluation of the region and finds that Newcastle disease is not likely to be present in its commercial bird or poultry populations.

In accordance with § 94.6(a)(2)(i), APHIS maintains a list of regions in which HPAI is considered to exist. Paragraph (a)(2)(ii) states that APHIS will remove a region from this list only after it conducts an evaluation of the region and finds that HPAI is not likely to be present in its commercial bird or poultry populations.

The regulations in 9 CFR part 92, § 92.2, contain requirements for requesting the recognition of the animal health status of a region (as well as for the approval of the export of a particular type of animal or animal product to the United States from a foreign region). If, after review and evaluation of the information submitted in support of the request, APHIS believes the request can be safely granted, APHIS will make its evaluation available for public comment through a document published in the **Federal Register**. Following the close of the comment period, APHIS will review all comments received and will make a final determination regarding the request that will be detailed in another document published in the **Federal Register**.

The Government of Romania has requested that APHIS evaluate the HPAI and Newcastle disease status of the country. In response to Romania's request, we have prepared an evaluation, titled "APHIS Evaluation of the Highly Pathogenic Avian Influenza and Newcastle Disease Status of Romania" (May 2019). Based on this evaluation, we have determined that Romania's domestic poultry populations are currently free of both HPAI and Newcastle disease as defined in 9 CFR 94.0. APHIS acknowledges the continuing risk posed by wild birds in Romania and the European Union (EU); however, Romania's competent veterinary authority takes effective prevention and control measures minimizing the risk of introduction to commercial poultry, and these are sufficient to minimize the likelihood of
