Issuance of Multiple Exemptions in Response to COVID–19 Public Health Emergency

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemptions; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) issued 15 exemptions in response to requests from 7 licensees. The exemptions afford these licensees temporary relief from certain requirements under NRC regulations. The exemptions are in response to the licensees' requests for relief due to the coronavirus disease 2019 (COVID–19) public health emergency (PHE). The NRC is issuing a single notice to announce the issuance of the exemptions.

DATES: During the period from August 3, 2020, to August 28, 2020, the NRC granted 15 exemptions in response to requests submitted by licensees from June 24, 2020, to August 20, 2020.

ADDRESSES: Please refer to Docket ID NRC–2020–0110 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC–2020–0110. Address questions about NRC Docket IDs in *Regulations.gov* to Jennifer Borges; telephone: 301–287–9127; email: Jennifer.Borges@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select

“Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC's Public Document Room reference staff at 1–800–397–4209, 301–415–4737, or by email to pdr.resource@nrc.gov.

For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the “Availability of Documents” section.

SUPPLEMENTARY INFORMATION:

I. Introduction

During the period from August 3, 2020, to August 28, 2020, the NRC granted 15 exemptions in response to requests submitted by licensees from June 24, 2020, to August 20, 2020. These exemptions temporarily allow the licensees to deviate from certain requirements (as cited below) of various parts of chapter I of title 10 of the *Code of Federal Regulations* (10 CFR).

The exemptions from certain requirements of 10 CFR part 26, “Fitness for Duty Programs,” for Exelon Generation Company, LLC (for James A. FitzPatrick Nuclear Power Plant), and NextEra Energy Point Beach, LLC (for Point Beach Nuclear Plant, Units 1 and 2) allow these licensees temporary relief from the work-hour controls under 10 CFR 26.205(d)(1) through (d)(7). The exemptions from 10 CFR 26.205(d)(1) through (d)(7) ensure that the control of work hours and management of worker fatigue do not unduly limit licensee flexibility in using personnel resources to most effectively manage the impacts of the COVID–19 PHE on maintaining the safe operation of these facilities. Specifically, the licensees stated that their staffing levels are affected or are expected to be affected by the COVID–19 PHE, and they can no longer meet or likely will not meet the work-hour controls of 10 CFR 26.205(d)(1) through (d)(7). The licensees have committed to effecting site-specific administrative controls for COVID–19 PHE fatigue-management for personnel specified in 10 CFR 26.4(a).

The exemption from certain requirements of 10 CFR part 55, “Operators' Licenses,” for NextEra Energy Point Beach, LLC (for Point Beach Nuclear Plant, Units 1 and 2) affords the licensee a temporary exemption from requirements related to licensed operator requalification program scheduling (under 10 CFR

55.59(a)(1), 10 CFR 55.59(a)(2), and 10 CFR 55.59(c)(1)). The exemption from the requalification program requirements provides increased scheduling flexibility to manage conditions resulting from the COVID–19 PHE by allowing NextEra Energy Point Beach, LLC to reduce the possibility of exposures associated with groups of people gathered in a single location, as discussed above.

The exemptions from certain requirements of 10 CFR part 73 for Exelon Generation Company, LLC (for Byron Station, Unit Nos. 1 and 2; Clinton Power Station, Unit No. 1; Dresden Nuclear Power Station, Units 2 and 3; LaSalle County Station, Units 1 and 2; Limerick Generating Station, Units 1 and 2; Nine Mile Point Nuclear Station, Units 1 and 2; Quad Cities Nuclear Power Station, Units 1 and 2); Entergy Nuclear Operations, Inc. (for Palisades Nuclear Plant); Nebraska Public Power District (for Cooper Nuclear Station); Southern Nuclear Operating Company, Inc. (for Edwin I. Hatch Nuclear Plant, Unit Nos. 1 and 2; and Joseph M. Farley Nuclear Plant, Units 1 and 2); PSEG Nuclear LLC (for Hope Creek Generating Station and Salem Nuclear Generating Station, Unit Nos. 1 and 2); and Entergy Operations, Inc. (for Waterford Steam Electric Station, Unit 3) afford these licensees temporary exemptions from certain requirements of 10 CFR part 73, appendix B, “General Criteria for Security Personnel,” section VI. The exemptions will help to ensure that these regulatory requirements do not unduly limit licensee flexibility in using personnel resources in a manner that most effectively manages the impacts of the COVID–19 PHE on maintaining the safe and secure operation of these facilities and the implementation of the licensees' NRC-approved security plans, protective strategy, and implementing procedures. These licensees have committed to certain security measures to ensure response readiness and for their security personnel to maintain performance capability.

The NRC is providing compiled tables of exemptions using a single **Federal Register** notice for COVID–19-related exemptions instead of issuing individual **Federal Register** notices for each exemption. The compiled tables below provide transparency regarding the number and type of exemptions the NRC has issued. Additionally, the NRC publishes tables of approved regulatory actions related to the COVID–19 PHE on its public website at <https://www.nrc.gov/about-nrc/covid-19/reactors/licensing-actions.html>.

II. Availability of Documents

The tables below provide the facility name, docket number, document title, and ADAMS accession number for each

exemption issued. Additional details on each exemption issued, including the exemption request submitted by the respective licensee and the NRC's decision, are provided in each

exemption approval listed in the tables below. For additional directions on accessing information in ADAMS, see the **ADDRESSES** section of this document.
