

basin population of the Snake River Spring/Summer Chinook salmon (*Oncorhynchus tshawytscha*) and Snake River steelhead (*Oncorhynchus mykiss*) Evolutionarily Significant Units (ESU).

Background

The Nez Perce Tribe has submitted to NMFS a Tribal Plan for recreational, ceremonial, and subsistence fisheries in 2002 potentially affecting threatened Snake River spring/summer chinook salmon in the Imnaha River basin. The Tribal Plan includes recreational fisheries specified by the Oregon Department of Fish and Wildlife that take place in the same waters and in the same time frame as the tribal ceremonial and subsistence fisheries. The Nez Perce Tribe and the State of Oregon have co-manager responsibilities for spring chinook salmon within the Imnaha River sub-basin and manage this salmon population under cooperative agreements. The objective of the Tribal Plan is to harvest spring chinook in a manner that does not appreciably reduce the likelihood of survival and recovery of the ESU. Impact levels to the listed spring chinook populations in the ESU are specified in the Tribal Plan. Analysis of the predicted return of naturally and hatchery-produced spring chinook salmon to the Imnaha River basin in 2002 and the proposed harvest levels indicate that all hatchery brood stock and supplemental spawning and natural spawning escapement needs will be met after the proposed fisheries. A variety of monitoring and evaluation tasks to be conducted by the co-managers is specified in the Tribal Plan to assess the abundance of spring chinook and to determine fishery effort and catch of spring chinook. A comprehensive review of the Tribal Plan to evaluate whether the fisheries and listed spring chinook populations are performing as expected will be done within and at the end of the proposed 2002 season.

As required by the ESA 4(d) rule for Tribal Plans (65 FR 42481, July 10, 2000), the Secretary is seeking public comment on his pending determination as to whether the Tribal Plan for Imnaha River chinook salmon would appreciably reduce the likelihood of survival and recovery of the threatened Snake River spring/summer chinook salmon ESU.

Under section 4(d) of the ESA, the Secretary is required to adopt such regulations as he deems necessary and advisable for the conservation of species listed as threatened. NMFS has issued a final ESA 4(d) Rule for Tribal Plans adopting regulations necessary and advisable to harmonize statutory

conservation requirements with tribal rights and the Federal trust responsibility to tribes (65 FR 42481, July 10, 2000). This 4(d) Rule for Tribal Plans applies the prohibitions enumerated in section 9(a)(1) of the ESA. NMFS did not find it necessary and advisable to apply the take prohibitions described in sections 9(a)(1)(B) and 9(a)(1)(C) to fishery harvest activities if the fisheries are managed in accordance with a Tribal Plan that has been approved by NMFS. As specified in the 4(d) Rule, before the Secretary makes a decision on the Tribal Plan, the public must have an opportunity to review and comment on the pending determination.

Authority

Under section 4 of the ESA, the Secretary is required to adopt such regulations as he deems necessary and advisable for the conservation of the species listed as threatened. The ESA Tribal 4(d) Rule (65 FR 42481, July 10, 2000) states that the ESA section 9 take prohibitions will not apply to Tribal Plans that will not appreciably reduce the likelihood of survival and recovery for the listed species.

Dated: May 10, 2002.

Wanda L. Cain,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 051002F]

Gulf of Mexico Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Gulf of Mexico Fishery Management Council (Council) will convene a public meeting of the Mackerel Stock Assessment Panel (MSAP).

DATES: This meeting will begin at 1:30 p.m. on Tuesday, May 28, 2002 and will conclude by 3 p.m. on Thursday, May 30, 2002.

ADDRESSES: The meeting will be held at NMFS Southeast Fisheries Science Center, 75 Virginia Beach Drive, Miami, FL.

FOR FURTHER INFORMATION CONTACT: Dr. Richard Leard, Senior Fishery Biologist, Gulf of Mexico Fishery Management Council, 3018 U.S. Highway 301 North, Suite 1000, Tampa, FL 33619; telephone: 813-228-2815.

SUPPLEMENTARY INFORMATION: The MSAP will convene to review a new stock assessment for Gulf group king mackerel and stock assessment updates for Gulf group Spanish mackerel and Atlantic group king and Spanish mackerel. The MSAP will consider available information, including but not limited to, commercial and recreational catches, natural and fishing mortality estimates, recruitment, fishery-dependent and fishery-independent data, bycatch and bycatch mortality, and data needs. These analyses will be used to determine the condition of the stocks and possibly the levels of acceptable biological catch (ABC) for the 2002-2003 fishing year. The MSAP may also review estimates/proxies for maximum sustainable yield (MSY), optimum yield (OY), as well as overfishing and overfished definitions for Gulf bluefish, cero, and little tunny.

Although non-emergency issues not contained in the agenda may come before the MSAP for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act (MSFCMA), those issues may not be the subject of formal MSAP action during this meeting. MSAP action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305 (c) of the MSFCMA, provided the public has been notified of the Council's intent to take final action to address the emergency. A copy of the MSAP agenda can be obtained by calling (813) 228-2815.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Anne Alford at the Council (see **ADDRESSES**) by May 21, 2002.

Dated: May 13, 2002.

Richard W. Surdi,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
