On August 21, 2024, the Office of Head

Start (OHS) published a final rule: Supporting the Head Start Workforce and Consistent Quality Programming. This information collection contains changes to recordkeeping requirements as described in this final rule.

DATES: *Comments due within 30 days of publication.* OMB must make a decision about the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication.**ADDRESSES:** Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. You can also obtain copies of the proposed collection of information by emailing infocollection@acf.hhs.gov. Identify all emailed requests by the title of the information collection.**SUPPLEMENTARY INFORMATION:***Description:* Section 641A of the Head Start Act, 42 U.S.C. 9836A, directs the

U.S. Department of Health and Human Services to develop “scientifically based and developmentally appropriate education performance standards related to school readiness” and “ensure that any such revisions in the standards do not result in the elimination of or any reduction in quality, scope, or types of health, educational, parental involvement, nutritional, social, or other services.” This information collection is entirely record keeping and does not contain any standardized instruments to provide flexibility for local programs. These records are intended to act as a tool for grantees and delegate agencies to be used in their day-to-day operations. For example, this includes the requirement that programs maintain a waiting list of eligible families. On August 21, 2024, OHS published a final rule, Supporting the Head Start Workforce and Consistent Quality Programming (89 FR 67720). This information collection contains changes to recordkeeping requirements as described in this final rule.

Respondents: Head Start grant recipients. Depending on the standard, the calculated burden hours is based on the individual enrollee, family, grant, program, or staff. In a few cases, only a proportion of one of these may apply.**ANNUAL BURDEN ESTIMATES**

Administration for Children and Families

Submission for OMB Review; Pre-testing Administration for Children and Families Data Collection Activities (Office of Management and Budget #: 0970–0355)

AGENCY: Administration for Children and Families, U.S. Department of Health and Human Services.
ACTION: Request for public comments.

SUMMARY: The Administration for Children and Families (ACF) proposes revisions to the existing overarching generic clearance for Pre-testing of ACF Data Collection Activities (Previously titled Pre-testing of Evaluation Data Collection Activities; Office of Management and Budget (OMB) #0970–0355). Revisions are proposed to broaden the scope of the generic to include pretesting of data elements used on information collections that are not specifically for research and evaluation. This includes updates to the title of the request, overarching description, and burden estimates. We are also requesting an extension for currently approved information collections under this generic.

DATES: *Comments due* September 25, 2024. OMB must make a decision about

the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. You can also obtain copies of the proposed collection of information by emailing OPREinfocollection@acf.hhs.gov. Identify all requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:
Description: ACF intends to request approval from OMB for an extension with revisions for a generic clearance to pre-test data collections with more than nine participants to identify and resolve any questions or problems that may arise, and to assess potential data quality, prior to full-scale administration.

This generic is available for use by ACF program offices but is most often used by the ACF Office of Planning, Research, and Evaluation (OPRE). OPRE studies ACF programs and the populations they serve, through rigorous research and evaluation projects. These include evaluations of existing programs, evaluations of innovative approaches to helping low-income children and families, research syntheses, and descriptive and exploratory studies.

ACF program offices could benefit from use of this pretesting generic for similar purposes outlined above, as well as to inform the development of data

collection activities such as grant recipient forms, forms used by programs on ACF’s behalf, and other data collection efforts driven by ACF. This could be used to inform a variety of data collection efforts in ACF to allow for consistent data requests across program offices that are high quality and appropriate to respondents who represent ACF program populations. For example, ACF envisions using this mechanism to pre-test sexual orientation and gender identity questions with youth. This is an area with minimal research and would benefit ACF program offices that serve youth. Program offices are also considering use of this generic for efforts to support language access for data collections, which a priority as detailed in Executive Order 13166, “Improving Access to Services for Persons with Limited English Proficiency.”

To improve the development of its data collection activities, ACF will use the pre-testing generic clearance to employ a variety of techniques including cognitive and usability laboratory and field techniques, behavior coding, exploratory interviews, respondent debriefing questionnaires, split sample experiments, focus groups, and pilot studies/pre-tests. These activities allow ACF to identify if and when a data collection may be simplified for respondents, respondent burden may be reduced, data elements could be improved, and other possible improvements.

Following standard OMB requirements, ACF will submit directly to OMB, a request specific to each individual proposed data collection activity under this generic clearance. Each request will include the individual instrument(s), a justification specific to the individual information collection,
