I. Background

Duke Energy Florida, Inc., is the holder of Facility License No. DPR-72. The license provides, among other things, that the facility is subject to all rules, regulations, and orders of the NRC now or hereafter in effect.

The facility consists of a permanently shutdown and defueled pressurized water reactor located in Citrus County, Florida.

By letter dated February 20, 2013 (ADAMS Accession No. ML13056A005), DEF submitted to the NRC the certification in accordance with §§ 50.82(a)(1)(i) and 50.82(a)(1)(ii) of Title 10 of the *Code of Federal Regulations* (10 CFR) indicating it permanently ceased power operations and that the CR3 reactor vessel was permanently defueled.

II. Request/Action

On July 17, 2013 (ADAMS Accession No. ML13204A397), the licensee requested an exemption from §§ 73.55(p)(1)(i) and 73.55(p)(1)(ii), pursuant to § 73.5, "Specific exemptions," which requires, in part, that a licensed senior operator approves the suspension of security measures during certain emergency conditions or during severe weather. Portions of the letter dated July 17, 2013, contain sensitive unclassified nonsafeguards information (security-related) and, accordingly, have been withheld from public disclosure. The regulations in §§ 73.55(p)(1)(i) and 73.55(p)(1)(ii), respectively, specify that the suspension of security measures must be approved by, as a minimum, a licensed senior operator, or a licensed senior operator with input from the security supervisor or manager.

The exemption request relates solely to the licensing requirements specified in the regulations for the staff directing suspension of security measures in
