Receipt of Incidental Take Permit Application and Proposed Habitat Conservation Plan for the Rosewater Wind Farm, White County, Indiana; Categorical Exclusion

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability of documents; request for comment and information.

SUMMARY: We, the U.S. Fish and Wildlife Service, have received an application from Rosewater Wind Farm LLC (applicant), for an incidental take permit (ITP) under the Endangered Species Act (ESA), for its Rosewater Wind Farm (project). If approved, the ITP would be for a 6-year period and would authorize the incidental take of an endangered species, the Indiana bat, and a threatened species, the northern long-eared bat. The applicant has prepared a habitat conservation plan that describes the actions and measures that the applicant would implement to avoid, minimize, and mitigate incidental take of the Indiana bat and northern long-eared bat. We request public comment on the application, which includes the applicant's proposed habitat conservation plan (HCP), and on the Service's preliminary determination that this HCP qualifies as "low-effect," categorically excluded under the National Environmental Policy Act. To make this determination, we used our environmental action statement and low-effect screening form, both of which are also able for public review.

DATES: We will accept comments received or postmarked on or before January 11, 2021.

ADDRESSES: *Document availability:* Electronic copies of the documents this notice announces, along with public comments received, will be available online in Docket No. FWS–R3–ES–2020–0128 at <http://www.regulations.gov>.

Comment submission: In your comment, please specify whether your comment addresses the proposed HCP, draft environmental action statement, or any combination of the aforementioned documents, or other supporting documents. You may submit written comments by one of the following methods:

- *Online:* <http://www.regulations.gov>. Search for and submit comments on Docket No. FWS–R3–ES–2020–0128.

- *U.S. mail:* Public Comments Processing, Attn: Docket No. FWS–R3–ES–2020–0128; U.S. Fish and Wildlife Service; 5275 Leesburg Pike, MS: PRB/3W; Falls Church, VA 22041–3803.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service, have received an application from Rosewater Wind Farm LLC (applicant), for an incidental take permit (ITP) under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The applicant requests the 6-year ITP to take the federally listed Indiana bat (*Myotis sodalis*) and northern long-eared bat (*Myotis septentrionalis*) incidental to the operation of 25 wind turbines with a total generating capacity of 102 megawatt (MW) at the Rosewater Wind Farm in White County, Indiana. While the ITP is for 6 years, the operational life of most new wind energy facilities is thirty years and intensive monitoring conducted during this permit term will inform the need for future avoidance or a new long-term ITP for the remaining life of the project that will comply with a new NEPA analysis and habitat conservation plan (HCP). The applicant has prepared a HCP that describes the actions and measures that the applicant would implement to avoid, minimize, and mitigate incidental take of the covered species for the first 6 years. We request public comment on the application, which includes the applicant's proposed HCP, and on the Service's preliminary determination that this HCP qualifies as "low-effect," categorically excluded under the
