

animals. Sheep, goats, and horses are also susceptible to *B. abortus*. In horses, the disease is known as fistulous withers. A third strain of *Brucella*, *B. melitensis*, affects mainly goats and sheep.

The regulations in 9 CFR part 51 include an indemnity program for sheep, goats, and horses that may be destroyed because of brucellosis. This indemnity program, which is similar to our indemnity program for cattle and bison, is voluntary and is a crucial tool for encouraging owners of infected or exposed animals to destroy them as part of our ongoing program to eradicate brucellosis in the United States.

The indemnity program for the voluntary depopulation of sheep, goats, and horses infected with brucellosis involves the use of a number of information collection activities, including the completion of indemnity claims, recording of test results, obtaining a permit for the movement of restricted animals, submission of proof of destruction, requests for extension of certain program-related deadlines, and the use of official seals and animal identification associated with the information collection activities.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.7272 hours per response.

Respondents: Eligible owners of sheep, goats, horses, and materials destroyed, and claimants incurring costs for which compensation might be sought under the brucellosis indemnity

program; and program support personnel including accredited veterinarians and State veterinarians.

Estimated annual number of respondents: 3.

Estimated annual number of responses per respondent: 3.67.

Estimated annual number of responses: 11.

Estimated total annual burden on respondents: 8 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 29th day of August 2013.

Michael C. Gregoire,

Acting Administrator, Animal and Plant Health Inspection Service.
