### Background

Complaints have been received alleging that the bridge is unreasonably obstructive to navigation. Information available to the Coast Guard indicates numerous bridge allisions have occurred between 1995 and 2007. The

navigation opening of the bridge is 150 feet and causes significant delays to commercial water traffic. Mariners transit the bridge under a non-navigation span when possible. During periods of high water mariners often double trip the bridge, which adds many hours to the bridge transit. Based on the comments received at the public meeting, the bridge may be found to be unreasonably obstructive to navigation. Such a finding may require relocating and increasing the horizontal clearance of the railroad bridge to meet the reasonable needs of navigation.

### Procedural

The hearing is open to the public. Attendees at the meeting, who wish to present testimony and have not previously made a request to do so, will follow those having submitted a request, as time permits. If a large number of persons wish to speak, the presiding officer may limit the time allotted to each speaker. Conversely, the public meeting may end early if all present wishing to speak have done so.
