

Refuge System Improvement Act of 1997 (16 U.S.C. 668dd–668ee), the Service is to manage all lands in the National Wildlife Refuge System in accordance with an approved CCP. The plan guides management decisions and identifies refuge goals, management objectives, and strategies for achieving refuge purposes over a 15-year period.

The planning process will cover many elements, including wildlife and habitat management, visitor and recreational activities, wilderness area management, cultural resource protection, and facilities and infrastructure. Compatibility determinations will be completed for all applicable refuge public uses. We will also conduct a wilderness review on refuge lands to determine whether any areas on the refuge qualify for those Federal designations.

Public input into the planning process is essential. The comments we receive will help identify key issues and refine our goals and objectives for managing refuge resources and visitor use. Additional opportunities for public participation will arise throughout the planning process, which we expect to complete by September 2008. We are presently summarizing refuge data and collecting other resource information to provide us a scientific basis for our resource decisions. We will prepare the EA in accordance with the Council on Environmental Quality procedures for implementing the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370d).

The 1,672-acre Wapack NWR, established through donation in 1972, was New Hampshire's first national

wildlife refuge. It is administered by Great Bay NWR, headquartered in Newington, New Hampshire. Its purpose is for use as an inviolate sanctuary or any other management purpose for migratory birds. The refuge is located about 20 miles west of Nashua, New Hampshire, and encompasses the 2,278-foot North Pack Monadnock Mountain in the towns of Greenfield, Lyndeborough, and Temple. The terms of the deed of donation require the Service to manage the refuge as a "wilderness" for wildlife. Specific restrictions include prohibiting hunting, fishing, trapping, motorized vehicles and tree cutting.

Generally, refuge lands are characterized by mature northern hardwood-mixed and conifer (spruce-fire) forest. These forests provide nesting habitat for numerous migratory songbirds, such as the black-capped chickadee, blackburnian warbler, black-throated blue warbler, hermit thrush, myrtle warbler, ovenbird and red-eyed vireo. The refuge also supports a wide variety of wildlife, including deer, bear, coyote, fisher, fox, mink and weasel.

Refuge visitors annually engage in wildlife observation and photography. The refuge is especially popular as a hawk migration viewing area. A 3-mile segment of the 21-mile Wapack Trail, a spur of the Appalachian Trail, traverses the refuge and rewards hikers with a beautiful view of the surrounding mountains.

#### Trinity Adaptive Management Working Group

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of meeting.

**SUMMARY:** The Trinity Adaptive Management Working Group (TAMWG) affords stakeholders the opportunity to give policy, management, and technical input concerning Trinity River (California) restoration efforts to the Trinity Management Council. Primary objectives of the meeting will include discussion of the following topics: Trinity River Restoration Program (TRRP) FY08 budget, 2007 Trinity River flow schedule, TRRP science program issues, 2006 salmon returns, salmon disease and mortality studies, Central Valley Project Improvement Act program review, TRRP executive

director's report, and election of TAMWG officers. Completion of the agenda is dependent on the amount of time each item takes. The meeting could end early if the agenda has been completed. The meeting is open to the public.

**DATES:** The Trinity Adaptive Management Working Group will meet from 1 p.m. to 5 p.m. on Monday, March 19, 2007 and from 8:30 a.m. to 5 p.m. on Tuesday, March 20, 2007.

**ADDRESSES:** The meeting will be held at the Weaverville Victorian Inn, 1709 Main St., 299 West, Weaverville, 96093. For more information, please contact the U.S. Fish and Wildlife Service, 1655
