#### SUPPLEMENTARY INFORMATION:

##### A. OMB Control Number, Title, and Any Associated Form(s)

9000-0026, Change Order Accounting and Notification of Changes.

##### B. Need and Uses

This clearance covers the information that contractors must submit to comply with the Federal Acquisition Regulation (FAR) part 43 requirements as stated in the following clauses:

*FAR 52.243-1, Changes—Fixed-Price, 52.243-2, Changes—Cost-Reimbursement, and 52.243-3, Changes—Time-and-Materials or Labor-Hours.* Contractors are required to assert their right to an adjustment under these clauses within 30 days after receipt of a written change order from the contracting officer.

*FAR 52.243-4, Changes.* For acquisitions for dismantling, demolition, or removal of improvements; and fixed-price construction contracts that exceed the simplified acquisition threshold, the contractor must assert its right to an adjustment under this clause within 30 days after receipt of a written change order or the furnishing of a written notice, by submitting to the contracting officer a written statement describing the general nature and amount of proposal, unless this period is extended by the Government. The written notice covers any other written or oral order (which includes direction, instruction, interpretation, or determination) from

the contracting officer that causes a change. The contractor gives the contracting officer written notice stating (1) the date, circumstances, and source of the order and (2) that the contractor regards the order as a change order. The statement of proposal for adjustment may be included in the written notice.

*FAR 52.243-6, Change Order Accounting.* The contracting officer may require change order accounting whenever the estimated cost of a change or series of related changes exceeds \$100,000. The contractor, for each change or series of related changes, shall maintain separate accounts, by job order or other suitable accounting procedure, of all incurred segregable, direct costs (less allocable credits) of work, both changed and not changed, allocable to the change. The contractor shall maintain these accounts until the parties agree to an equitable adjustment or the matter is conclusively disposed of under the Disputes clause. This requirement is necessary in order to be able to account properly for costs associated with changes in supply and research and development (R&D) contracts of significant technical complexity, if numerous changes are anticipated, or construction contracts if deemed appropriate by the contracting officer.

*FAR 52.243-7, Notification of Changes.* The clause is available for use primarily in negotiated R&D or supply contracts for the acquisition of major weapon systems or principal subsystems. If the contract amount is expected to be less than \$1,000,000, the clause shall not be used, unless the contracting officer anticipates that situations will arise that may result in a contractor alleging that the Government has effected changes other than those identified as such in writing and signed by the contracting officer. The contractor shall notify the Administrative Contracting Officer in writing if the contractor identifies any Government conduct (including actions, inactions, and written or oral communications) that the contractor regards as a change to the contract terms and conditions. This excludes changes identified as such in writing and signed by the contracting officer. On the basis of the most accurate information available to the contractor, the notice shall state—

(1) The date, nature, and circumstances of the conduct regarded as a change;

(2) The name, function, and activity of each Government individual and Contractor official or employee involved in or knowledgeable about such conduct;
