

employers must prepare a written certification that includes the identity of the employee trained, the signature of the employer or the trainer, and the date the employee completed the training. In addition, the employer must maintain an employee's training certificate for the duration of their employment and, on request, make it available to OSHA.

Emergency action plans allow employers and employees to anticipate, and effectively respond to, emergencies that may arise during powered platform operations. Affixing load rating plates to suspended units, instructions to emergency electric operating devices, and tags to wire rope fasteners prevent workplace accidents by providing information to employers and employees regarding the conditions under which they can safely operate these system components. Requiring building owners to establish and maintain written certification of inspections and testing conducted on the supporting structures of buildings, powered platform systems, and suspension wire ropes provides employers and employees with assurance that they can operate safely from the buildings using equipment that is in safe operating condition.

The training requirements increase employee safety by allowing them to develop the skills and knowledge necessary to effectively operate, use, and inspect powered platforms, recognize and prevent safety hazards associated with platform operation, respond appropriately under emergency conditions, and maintain and use their fall protection arrest system. Training certification permits employers to review the training provided to their employees, thereby ensuring that the employees received the necessary training. In addition, the paperwork requirements specified by the Standard provide the most efficient means for an OSHA compliance officer to determine whether or not employers and building owners are providing the required notification, certification, and training.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and

- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Standard on Powered Platforms for Building Maintenance (29 CFR 1910.66). The Agency is requesting to retain its current burden hour total of 135,656 hours associated with this Standard. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Standard on Powered Platforms for Building Maintenance (29 CFR 1910.66).

OMB Number: 1218-0121.

Affected Public: Business or other for-profit.

Number of Respondents: 900.

Frequency: On occasion; initially, monthly, annually.

Average Time Per Response: Varies from 2 minutes (.03 hour) to disclose certification records to 10 hours to inspect/test both a powered platform facility and its suspension wire ropes, and to prepare the certification record.

Total Burden Hours Requested: 135,656.

Estimated Cost (Operation and Maintenance): \$0.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows:

- (1) Electronically at <http://www.regulations.gov>, which is the Federal eRulemaking Portal; (2) by facsimile (FAX); or (3) by hard copy. All comments, attachments, and other material must identify the Agency name and the OSHA docket number for the ICR (Docket No. OSHA-2007-0062). You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled **ADDRESSES**). The additional materials must clearly identify your electronic comments by your name, date, and the docket number so the Agency can attach them to your comments.

Because of security procedures, the use of regular mail may cause a

significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693-2350 (TTY (877) 889-5627). Comments and submissions are posted without change at <http://www.regulations.gov>. Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and date of birth. Although all submissions are listed in the <http://www.regulations.gov> index, some information (e.g., copyrighted material) is not publicly available to read or download through this Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the <http://www.regulations.gov> Web site to submit comments and access the docket is available at the Web site's "User Tips" link. Contact the OSHA Docket Office for information about materials not available through the Web site, and for assistance in using the Internet to locate docket submissions.

V. Authority and Signature

Edwin G. Foulke, Jr., Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506, *et seq.*) and Secretary of Labor's Order No. 5-2007 (72 FR 31159).

Signed at Washington, DC, on October 2, 2007.

Edwin G. Foulke, Jr.,

Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510-26-P

NATIONAL SCIENCE FOUNDATION

Committee on Equal Opportunities in Science and Engineering (CEOSE); Notice of Meeting—Correction

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announced the meeting of the Committee on Equal Opportunities in Science and Engineering (1173) on October 16 and 17, 2007 at the National Science Foundation. This notice was published on September 21, 2007, on page 54080, FR Doc. E7-18597.

Below is the corrected agenda. It contains the following changes:

- On October 16 the American Community Survey has been removed

and the Planning for the Minority Technical Organization Summit has been added.

- The Report on the NSF Broadening Participation Plan has been moved to October 17.

Contact Person: Dr. Margaret E.M. Tolbert, Senior Advisor and Executive Liaison, CEOSE, Office of Integrative Activities, National Science Foundation, 4201 Wilson Boulevard Arlington, VA 22230, Telephone: (703) 292-8040, mtolbert@nsf.gov.

Agenda

Tuesday, October 16, 2007

Welcome and Opening Statement by the CEOSE Chair

Introductions

Presentations and Discussions:

- Experimental Program to Stimulate Competitive Research
- Broadening Participation Briefings on NSF Advisory Committee Meetings
- Planning for the Minority Technical Organization Summit
- Concurrent Planning Meetings of CEOSE *Ad Hoc* Subcommittees
- Reports on Strategic Planning by CEOSE, Mini-Symposium: Institutions Serving Persons with Disabilities Who Are in STEM Fields, and Broadening Participation Efforts of Several Federal Agencies

Wednesday, October 17, 2007

Opening Statement by the New CEOSE Chair

Presentations/Discussions:

- Report on the NSF Broadening Participation Plan
- Broadening Participation Initiatives of the NSF Directorate for Engineering
- Broadening Participation Initiatives of the Chemistry Division of the NSF Directorate for Mathematical and Physical Sciences
- Discussion Topics Pertinent to the CEOSE Mandate with the NSF Director and Deputy Director

Completion of Unfinished Business

Dated: October 1, 2007.

Susanne Bolton,

Committee Management Officer.

BILLING CODE 7555-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-285]

Omaha Public Power District; Notice of Denial of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (NRC or the Commission) has denied a request by Omaha Public Power District (the licensee), for an amendment to Renewed Facility Operating License No. DPR-40 issued to the licensee for operation of the Fort Calhoun Station, Unit No. 1, located in Washington County, Nebraska.

Notice of Consideration of Issuance of this amendment was published in the **Federal Register** on April 26, 2005 (70 FR 21459).

By letter dated March 31, 2005, the licensee requested an amendment to revise the Renewed Facility Operating License and Technical Specifications (TSs) to increase the license core power. Fort Calhoun Station, Unit No. 1, is currently licensed for a rated thermal power of 1500 megawatts thermal (MWt). Through the use of more accurate feedwater flow measurement equipment, approval was sought to increase this core power by 1.5 percent to 1522 MWt. The power uprate would be based on the use of the CROSSFLOW™ system for determination of main feedwater flow and the associated determination of reactor power through the performance of the power calorimetric currently required by the Fort Calhoun Station TSs.

The OPPD license amendment request to increase core power is based on Westinghouse topical report CENPD-397-P-A, "Improved Flow Measurement Accuracy Using Crossflow Ultrasonic Flow Measurement Technology," for new and future uses of the CROSSFLOW ultrasonic flow meter. The topical report provided several assessments with respect to that topical report to justify the power increase. Because the licensee's license amendment request is based on CENPD-397-P-A and the NRC staff has suspended its approval, as explained in the NRC staff's letter to Westinghouse dated September 26, 2007, of the use of this topical report in license amendment requests, the NRC staff has concluded that the licensee's request cannot be granted. The licensee was notified of the Commission's denial of the proposed change by a letter dated September 27, 2007.

By 30 days from the date of publication of this notice in the **Federal**

Register, the licensee may demand a hearing with respect to the denial described above. Any person whose interest may be affected by this proceeding may file a written petition for leave to intervene pursuant to the requirements of 10 CFR 2.309.

A request for hearing or petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001 Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland, by the above date. A request for hearing or petition for leave to intervene may also be transmitted directly to the Secretary of the Commission by means of facsimile transmission to 301-415-1101 or by e-mail to hearingdocket@nrc.gov. A copy of any petitions should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Copies of petitions may also be transmitted directly to the Office of the General Counsel by means of facsimile transmission to 301-415-3725 or by e-mail to OGCMailCenter@nrc.gov. A copy of any petitions should also be sent to James R. Curtiss, Esq., Winston & Strawn, 1700 K Street, NW., Washington, DC 20006-3817, Senior Counsel for the licensee.

For further details with respect to this action, see (1) The application for amendment dated March 31, 2005, and (2) the Commission's letter to the licensee dated September 27, 2007.

Documents may be examined, and/or copied for a fee, at the NRC's PDR, located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland, and will be accessible electronically through the Agencywide Documents Access and Management System's (ADAMS) Public Electronic Reading Room link at the NRC Web site <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1-800-397-4209, 301-415-4737, or by e-mail to pdr@nrc.gov.

Dated at Rockville, Maryland, this 27th day of September 2007.
