

specific to each alternative during the preparation of the EIS would have been impracticable and inefficient in light of the large number of alternatives located across three states and crossing numerous agency jurisdictional boundaries.

Instead, DOE will work with USFWS, National Oceanic and Atmospheric Administration (NOAA) Fisheries, U.S. Army Corps of Engineers, EPA, and other Federal, state, and local natural resource agencies to develop specific mitigation measures for unavoidable impacts to endangered species, EFH, wetlands, and other resources, as described in the final EIS. The mitigation plan for the alternative selected in this ROD will be developed during the permitting process, after wetland delineations and jurisdictional determinations and a functional assessment of affected wetlands is completed. DOE will also complete a formal consultation with USFWS and NOAA Fisheries and prepare a Biological Assessment as mandated under Section 7 of the Endangered Species Act for any endangered species that may be affected by the selected alternative. Through these activities, DOE will develop and adopt a detailed mitigation plan to take all practicable means to avoid or minimize environmental harm, as required by 40 CFR 1505.2(c).

Secretary of Energy.

ICR Status: This ICR is scheduled to expire on February 28, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. Abstract: RadNet is a national network of stations collecting sampling media that include air, precipitation, drinking water, and milk. Samples are sent to EPA National Air and Radiation Environmental Laboratory (NAREL) in Montgomery, Alabama, where they are analyzed for radioactivity. RadNet provides emergency response/homeland security and ambient monitoring information on levels of environmental radiation across the nation. All stations, usually operated by state and local personnel, participate in RadNet voluntarily. Station operators complete information forms that accompany the samples. The forms request descriptive information pertaining to sample location, e.g., sample type, sample location, length of sampling period, and volume represented.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.7 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing
