

k. *Description of Request:* Puget proposes to modify the upgrades to the two powerhouses (Plants 1 and 2), as well as to the diversion dam, as authorized in the June 29, 2004 Order Issuing New License. At Plant 1, Puget proposes to remove the Machine Shop and Transformer House, and to temporarily relocate the Carpenter Shop and West Garage. Instead of retiring the five generating units at Plant 1 and replacing them with two new generating units, Puget also proposes to preserve generating units 1 through 4, and to replace generating unit 5. Puget proposes to remove and rebuild the Gatehouse and Powerhouse at Plant 2 in order to address seismic deficiencies and allow for improvements as required by the license. Instead of installing an inflatable rubber weir diversion dam as authorized in the license, Puget proposes to construct a fixed crest dam at a reduced height. Puget also proposes widening the channel on the left bank to provide additional flood protection and a better approach for flows entering Plant 1.

l. Please note that the underlying license is currently before the U.S. Court of Appeals for the Ninth Circuit. Any final Commission action would have to be by leave of the court.
