Title of Information Collection: Criteria for TRICARE/CHAMPUS Coverage of Organ Transplantation.

Needs and Uses: TRICARE/CHAMPUS participating hospitals must file a narrative application to be approved for coverage and payment of organ transplants performed on TRICARE/CHAMPUS beneficiaries.

Affected Public: Business or other for profit.

Annual Burden Hours: 100.

Number of Respondents: 1.

Responses per Respondent: 1.

Average Burden per Response: 100 hours.

Frequency: Collected at the time of initial application. A facility that wishes

to obtain TRICARE/CHAMPUS coverage for organ transplantation shall submit a narrative application for approval and, once approved, report events or changes that would affect its approved status.

SUPPLEMENTARY INFORMATION:**Summary of Information Collection**

TRICARE Management Activity (TMA), formerly known as OCHAMPUS, is in the process of submitting a final rule for publication in the **Federal Register**, clarifying coverage of organ transplants. 32 CFR Part 199(e)(5) allows coverage for organ transplant procedures provided the procedure is in accordance with accepted professional medical standards and is not considered unproven. In the case of organ transplantation, we believe many other factors are related to the safety and efficacy of the transplant. Thus, coverage of organ transplantation requires detailed criteria to identify the context in which organ transplantation can be considered medically reasonable and necessary. The requested information is needed to ensure a hospital meets the criteria to qualify for CHAMPUS coverage and payment of transplants performed by the facility.

If a facility is a Medicare approved transplant center, TRICARE/CHAMPUS recognizes the facility as a TRICARE/CHAMPUS approved center for the specific organ for which the facility has received approval. If a facility is not Medicare approved, the hospital must provide information on patient selection, patient management, commitment, facility plans, experience and survival rates, maintenance of data, organ procurement, laboratory procedures and billing when it applies to TRICARE/CHAMPUS for a coverage determination.

This notice contains information collection requirements that are subject to the Office of Management and Budget approval under the Paperwork Reduction Act of 1980. The information collection concerns the requirement that a facility that wishes to obtain TRICARE/CHAMPUS coverage for organ transplantation submit an application for approval and, once approved, report events or changes that would affect its approved status. Public reporting burden for this collection of information is expected to be 100 hours.

There are no strict formats facilities must use in applying for coverage. The application is primarily narrative and has no standard format.

Dated: March 22, 2001.

[Recommendation 2001-1],

High-Level Waste Management at the Savannah River Site

Dated: March 23, 2001.

The mission of the Savannah River Site (SRS) high-level waste (HLW) system is to safely store and treat HLW while also supporting site initiatives such as the stabilization of remnants of nuclear weapons production. Storage of HLW is provided by 49 tanks, referred to collectively as the Tank Farms, which contain approximately 34 million gallons of HLW. Presently, treatment primarily consists of waste concentration in evaporators and sludge vitrification at the Defense Waste Processing Facility (DWPF). DWPF currently produces more than 225 vitrified waste canisters per year and during its lifetime is expected to produce a total of approximately 6,000 canisters. Recently, the most pressing challenge at the SRS Tank Farms has been managing available tank space.

Average annual waste inflow to the Tank Farms totals approximately 2.5 million gallons, generated primarily from vitrification activities and nuclear material stabilization. The largest portion of the inflow, approximately 1.3 million gallons, is the DWPF return
