Persons interested in being placed on a mailing list for future NPRM's should contact the FAA's Office of Rulemaking, (202) 267-9677, for a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) Part 71 by establishing Class E en route domestic airspace extending upward from 1,200 feet above the surface at the Truth or Consequences VORTAC navigation aid, Truth or Consequences, NM. This action would contain aircraft while in IFR conditions under control of Albuquerque ARTCC by vectoring aircraft from en route airspace to terminal areas.

Class E airspace designations are published in paragraph 6006, of FAA Order 7400.9X, dated August 7, 2013, and effective September 15, 2013, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in this Order.

The FAA has determined this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation; (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified this proposed rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106, describes the authority for the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of

airspace. This proposed regulation is within the scope of that authority as it would establish controlled airspace at the Truth or Consequences VORTAC, Truth or Consequences, NM.

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1E, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

Proposed Modification and Establishment of Air Traffic Service (ATS) Routes in the Vicinity of Huntingburg, IN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify a VOR Federal airway (V-243) and establish an area navigation (RNAV) route (T-325) in the vicinity of Huntingburg, IN. The FAA is proposing this action due to the scheduled decommissioning of the Huntingburg, IN (HNB), VHF Omnidirectional Range (VOR)/Distance Measuring Equipment (DME) facility that provides navigation guidance for a portion of V-243. This action would enhance the safety and efficient management of aircraft within the National Airspace System (NAS).

Background

The Huntingburg, IN, (HNB) VOR/DME facility is currently out of service. As a result, aircraft that file V-243 are being vectored between the Bowling Green, KY (BWG), VOR Tactical Air Navigation (VORTAC) and the Terre Haute, IN (TTH), VORTAC. In response to the proponent responsible for the HNB VOR/DME requesting the FAA decommission of the facility, the FAA conducted the required non-rulemaking study and public notice circularization actions to propose decommissioning the facility. As a result, a determination was made to permanently decommission the HNB VOR/DME due to maintenance issues associated with keeping the facility operational. Additionally, the HNB VOR/DME is not on the list of VORs planned for retention in the VOR Minimum Operational Network (MON). Therefore, the ATS routes, fixes, and procedures that utilize the HNB VOR/DME must be amended. With the decommissioning of the HNB VOR/DME, the ground-based navigation aid (NAVAID) coverage is insufficient to ensure the continuity of V-243. The proposed modification to V-243 would result in the segment between BWG and TTH being cancelled, but the remaining segments supported by other NAVAIDs being retained. To cover the cancelled segment of V-243, an RNAV route, T-325, would be established between BWG and TTH.

The Proposal

The FAA is proposing an amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 to amend VOR Federal airway V-243 and establish RNAV route T-325. The scheduled decommissioning of the HNB VOR/DME facility has made this action necessary. The proposed route modification and establishment actions are outlined below.

V-243: V-243 currently extends between Craig, FL (CRG) and TTH. The route segment between BWG and TTH would be cancelled. A new RNAV route, T-325, is proposed, as described below, to replace the cancelled Federal airway route segment, thereby furthering the
