### Grain Inspection, Packers and Stockyards Administration

#### 9 CFR Part 201

#### Scales; Accurate Weights, Repairs, Adjustments or Replacements After Inspection

**AGENCY:** Grain Inspection, Packers and Stockyards Administration, USDA.

**ACTION:** Direct final rule; correction.

**SUMMARY:** The Grain Inspection, Packers and Stockyards Administration is correcting a direct final rule that appeared in the **Federal Register** on April 29, 2014 (FR Doc. 2014–9655). The direct final rule required all scales used to weigh livestock, livestock carcasses, live poultry, or feed meet requirements contained in section 5.59, Electronic Livestock, Meat, and Poultry Evaluation Systems and/or Devices of the National Institute of Standards and Technology, Specifications, Tolerances, and other Technical Requirements for Weighing and Measuring Devices (NIST Handbook 44) 2013 edition. The NIST Handbook 44 includes additional requirements for scales used to weigh live animals, livestock and poultry carcasses, which should not have been excluded by this rule. The direct final rule should have incorporated, by reference, all of the General Code, Scales Code, and Weight Code from the 2013 edition of the NIST Handbook 44. Additionally, the direct final rule must reflect the change to the heading of § 201.71, as a result of NIST Handbook 44 requirements for electronic devices and systems and the correct email address for the National Conference for Weights and Measures.

**DATES:** This correction is effective June 30, 2014. The incorporation by reference of certain publications listed in the rule

is approved by the Director of the Federal Register as of June 30, 2014.
