

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

- (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

- (1) *Type of Information Collection:* New information collection.
 - (2) *Title of the Form/Collection:* Obligor Change of Address.
 - (3) *Agency form number, if any, and the applicable component of the Department of Homeland Security sponsoring the collection:* Form I-333. U.S. Immigration and Customs Enforcement.
 - (4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals or Households. The information collected on the Form I-333 is necessary for U.S. Immigration and Customs Enforcement (ICE) to provide immigration bond obligors a standardized method to notify ICE of address updates. Upon receipt of the formatted information records will then be updated to ensure accurate service of correspondence between ICE and the obligor.
 - (5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 12,000 responses at 15 minutes (.25 hours) per response.
 - (6) *An estimate of the total public burden (in hours) associated with the collection:* 3,000 annual burden hours.
- Requests for a copy of the proposed information collection instrument, with instructions; or inquiries for additional information should be directed to: Lee

Shirkey, Acting Chief, Records Management Branch; U.S. Immigration and Customs Enforcement, 500 12th Street, SW., Room 3138, Washington, DC 20536; (202) 732-6337.

Dated: December 16, 2008.

Lee Shirkey,

*Acting Chief, Records Management Branch,
U.S. Immigration and Customs Enforcement,
Department of Homeland Security.*

BILLING CODE 9111-28-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5187-N-76]

Study of Capital Needs in the Public Housing Program

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

Survey a statistically significant sample of housing authorities and a set of public housing developments, buildings and units, using instruments that include systems inspection coding and information, costs, and modernization and conversion actions. Using these instruments, the study will generate estimates in constant dollars of existing and accrued total and per-unit capital needs at the national level and for important subcategories such as HA size (measured by number of ACC units) and region. The sample and data instruments shall enable statistically significant comparison with results from the 1998 capital needs study. The Study responds to a Congressional mandate.

DATES: *Comments Due Date:* January 22, 2008.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB approval Number (2577-NEW) and should be sent to: HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax: 202-395-6974.

FOR FURTHER INFORMATION CONTACT: Lillian Deitzer, Reports Management

Officer, QDAM, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410; e-mail Lillian.Deitzer@HUD.gov or Lillian L. Deitzer at HUD.gov or telephone (202) 402-8048. This is not a toll-free number. Copies of available documents submitted to OMB may be obtained from Ms. Deitzer.

SUPPLEMENTARY INFORMATION: This notice informs the public that the Department of Housing and Urban Development has submitted to OMB a request for approval of the Information collection described below. This notice is soliciting comments from members of the public and affecting agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This notice also lists the following information:

Title of Proposal: Study of Capital Needs in the Public Housing Program.

OMB Approval Number: 2577-NEW.

Form Numbers: None.

Description of the Need for the Information and Its Proposed Use: Survey a statistically significant sample of housing authorities and a set of public housing developments, buildings and units, using instruments that include systems inspection coding and information, costs, and modernization and conversion actions. Using these instruments, the study will generate estimates in constant dollars of existing and accrued total and per-unit capital needs at the national level and for important subcategories such as HA size (measured by number of ACC units) and region. The sample and data instruments shall enable statistically significant comparison with results from the 1998 capital needs study. The Study responds to a Congressional mandate.

Frequency of Submission: Other one-time.

	Number of respondents	Annual responses	×	Hours per response	=	Burden hours
Reporting Burden	970	1		4.97		4,820

Total Estimated Burden Hours: 4,820.
Status: New Collection.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 35, as amended.

Dated: December 16, 2008.

Lillian L. Deitzer,

*Departmental Paperwork Reduction Act
Officer, Office of the Chief Information
Officer.*

BILLING CODE 4210-67-P

DEPARTMENT OF THE INTERIOR

U.S. Fish and Wildlife Service

[FWS-R3-ES-2008-N0263; 30120-1113-0000 D2]

Approved Recovery Plan for the Copperbelly Water Snake Northern Distinct Population Segment

AGENCY: Fish and Wildlife Service,
Interior.

ACTION: Notice of document availability.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the availability of the approved recovery plan for the copperbelly water snake (*Nerodia erythrogaster neglecta*) northern distinct population segment (DPS). The threatened copperbelly water snake northern DPS occurs in Michigan, Ohio, and Indiana. This plan includes specific recovery objectives and criteria to achieve delisting of the species from the Endangered Species Act (Act).

ADDRESSES: You may obtain a copy of the recovery plan by sending a request to Field Supervisor, U.S. Fish and Wildlife Service, Ecological Services Field Office, 2651 Coolidge Road, Suite 101, East Lansing, MI 48823-6316 (printed copies will be available for distribution within 4 to 6 weeks), or download it from the Internet at <http://www.fws.gov/endangered/recovery/index.html#plans>.

FOR FURTHER INFORMATION CONTACT: Ms. Barbara Hosler, at the above address or by telephone at (517) 351-6326. TTY users may contact Ms. Hosler through the Federal Relay Service at (800) 877-8339.

SUPPLEMENTARY INFORMATION:

Background

Recovery of endangered or threatened animals and plants to the point where

they are again secure, self-sustaining members of their ecosystems is a primary goal of our endangered species program. To help guide the recovery effort, we are working to prepare recovery plans for most listed species native to the United States. Recovery plans describe actions considered necessary for the conservation of the species, establish criteria for reclassification or delisting listed species, and estimate time and cost for implementing the measures needed.

The Act (16 U.S.C. 1531 *et seq.*) requires us to develop recovery plans for listed species unless such a plan will not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires us to provide the public notice and an opportunity for public review and comment during recovery plan development. We provided the draft copperbelly water snake recovery plan to the public and solicited comments from September 6, 2007, through November 5, 2007 (72 FR 51242). We considered information received during the public comment period and information from peer reviewers in our preparation of the recovery plan, and also summarized that information in Appendix E of this approved recovery plan.

We listed the copperbelly water snake northern DPS as threatened on January 29, 1997 (62 FR 4183). The northern DPS occurs in Michigan, Indiana, and Ohio, north of 40 degrees north latitude. The current distribution of the copperbelly water snake is limited to only five, very small scattered and isolated populations in south central Michigan, northeastern Indiana, and northwestern Ohio. Surveys indicate that the species is in decline throughout these areas.

Copperbelly water snakes have both wetland and terrestrial habitat requirements. The species is associated with wetland complexes characterized by a preponderance of shallow wetlands, many of which draw down seasonally. Such complexes may predominantly occur as isolated wetlands distributed in a forested upland matrix, floodplain wetlands fed by seasonal flooding, or a combination of both. Fishless wetlands, suitable for high anuran (frog and toad) productivity, are required to provide habitat and a suitable prey base.

The copperbelly water snake northern DPS is threatened by habitat loss and fragmentation, human persecution, inadequate habitat management, and road crossings. The principal limiting factor for this species is the availability of wetland/upland habitat complexes of sufficient size. Individuals move hundreds of meters or more between wetlands and routinely use multiple wetlands over the course of an active season. They also spend substantial periods of time in upland habitat aestivating, foraging, and shedding. Populations may require many hundreds of hectares of contiguous habitat in order to persist.

The principal recovery strategy is to establish and conserve multiple wetland/upland habitat complexes that provide adequate habitat for population persistence. The recovery strategy focuses on targeted habitat restoration and implementation of "best management practices" for land managers. The objective of the recovery plan is to provide a framework for the recovery of copperbelly water snake northern DPS so that protection by the Act is no longer necessary. The copperbelly water snake will be considered for delisting when section 4(a)(1) threat factors under the Act are assessed and when the following criteria are met: (1) Multiple population viability is assured; (2) sufficient habitat is conserved and managed; and (3) significant threats due to lack of suitable management, adverse land features and uses, collection, and persecution have been reduced or eliminated.

We will achieve these criteria through the following actions: (1) Identify and conserve habitat complexes sufficient for recovery; (2) monitor known copperbelly water snake populations and their habitat; (3) improve baseline understanding of copperbelly water snake ecology; (4) develop recovery approaches to enhance recruitment and population size; (5) develop and implement public education and outreach efforts; (6) review and track recovery progress; and (7) develop a plan to monitor copperbelly water snake after it is delisted.

Criteria to reclassify the copperbelly water snake northern DPS to endangered status is also provided. The species will be considered for reclassification from threatened to endangered status when section 4(a)(1) threat factors under the Act are assessed
