k. *Description of Request:* The applicants request a temporary variance to reduce the required minimum flow in Bucks Creek below Lower Bucks Lake from 8 to 6 cubic feet per second (cfs) during the month of June 2020, and to pass only natural streamflow into the Grizzly Creek below Grizzly Forebay from July 1 through November 1, 2020, which may drop below the required minimum flow of 6 cfs. The applicants also request to temporarily modify the minimum flow requirements such that compliance would be determined by calculating the average of all daily flow measurements rather than complying with instantaneous measurements. The applicants propose to implement the daily average compliance protocols for the Bucks Creek streamflow from May 1 through November 1, 2020, and for the Grizzly Creek requirement from July 1 through November 1, 2020.

Additionally, the applicants propose to dewater Lower Bucks Lake, taking it below its minimum required elevation of 4,966 feet from May 1 through November 1, 2020. The applicants state the variances are necessary to facilitate repairs and maintenance at the Lower Bucks dam and Grizzly forebay.
