International Airport and the airport identifier changed to (XWA).

The City of Williston proposes to relocate the Sloulin Field International Airport to develop aviation facilities that meet FAA airport design standards and accommodated current and projected levels of aviation activity. They propose to construct two runways and related aviation facilities that meet FAA airport design standards for Airport Reference Code (ARC) D-III aircraft as well as acquire land for compatible land use and expansion of facilities to future aviation demands. Development of a replacement airport requires FAA approval of an airport lavout plan (ALP), the final EA and FONSI/ROD and approval of funding from local agencies, North Dakota Aeronautics Commission (NDAC), and the FAA. The proposed action would require the acquisition of land for the construction of access roads, construction of runways, taxiways, aprons and various airport structures, and the installation of navigational aids to meet FAA design standards for ARC D-III aircraft. The proposed action includes acquisition of land for compatible land use, construction of facilities, and the closure and sale of the existing Sloulin Field International Airport. The relocated airport is anticipated to be constructed from 2015-2018, pending funding availability.

The FONSI/ROD indicates the project is consistent with existing environmental policies and objectives as set forth in the National Environmental Policy Act (NEPA) of 1969, as amended and will not significantly affect the quality of the environment.

In reaching this decision, the FAA has given careful consideration to: (a) The role of Williston Airport plays in the national air transportation system, (b) aviation safety, and (c) preferences of the airport owner/operator, and (d) anticipated environmental impact.

Agency Information Collection Activities: Requests for Comments; Clearance of Renewed Approval of Information Collection: Suspected Unapproved Parts Notification

AGENCY: Federal Aviation Administration (FAA), DOT. **ACTION:** Notice and request for

comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The information collected on the FAA Form 8120-11 is reported voluntarily by manufacturers, repair stations, aircraft owner/operators, air carriers, and the general public who wish to report suspected unapproved parts to the FAA for review. The report information is collected and correlated by the FAA, Aviation Safety Hotline Program Office, and used to determine if an unapproved part investigation is warranted.
