

regions of Xinjiang Province in China into the United States: *Eulecanium circumfluum* Borchsenius, a soft scale, and *Euzophera pyriella* Yang, the pyralid moth.

Based on the pest list, a risk management document (RMD) was prepared to identify the phytosanitary measures that could be applied to the importation of fragrant pears from the Akesu and Korla regions of Xinjiang Province to mitigate the pest risk.

We have determined that fragrant pears can safely be imported from the Akesu and Korla regions of Xinjiang Province subject to the following phytosanitary measures:

- The fragrant pears must be grown in the Akesu or Korla region at a production site that is registered with the NPPO of China.
- Registered production sites must have in place a production site control program approved by APHIS and the NPPO of China.
- The NPPO of China is responsible for ensuring that registered production sites are subject to field sanitation and that growers are aware of quarantine pests and control measures to be taken for their control. Such measures must be described in detail in an operational workplan approved by the NPPO of China and APHIS.
- Only intact fruits may be harvested for export and the harvested fruit must be safeguarded against quarantine pests from the production site until the consignment is shipped.
- Fragrant pears must be packed in a packinghouse registered with the NPPO of China.
- The packinghouses must have a tracking system in place that will allow for traceback of the fruit to individual production sites.
- Registered packinghouses are prohibited from packing fragrant pears destined for other countries while packing fruit destined for the United States.
- Packinghouse procedures must be in accordance with the operational workplan.
- Each shipping box must be marked with the identity of the packinghouse and grower.
- Each consignment of fragrant pears must be accompanied by a phytosanitary certificate issued by the NPPO of China attesting to place of origin (production site and region) and stating that all APHIS phytosanitary requirements have been met and that the consignment was inspected and found free of quarantine pests.
- Fragrant pears may be imported as commercial consignments only.

• Fragrant pears are subject to inspection at the port of entry into the United States.

• Fragrant pears must be imported under permit.

Therefore, in accordance with § 319.56–4(c)(3), we are announcing the availability of our pest list and RMD for public review and comment. Those documents, as well as a description of the economic considerations associated with the importation of fresh fragrant pears from the Akesu and Korla regions of Xinjiang Province in China, may be viewed on the *Regulations.gov* website or in our reading room (see **ADDRESSES** above for a link to *Regulations.gov* and information on the location and hours of the reading room). You may request paper copies of these documents by calling or writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. Please refer to the subject of the analysis you wish to review when requesting copies.

After reviewing any comments we receive, we will announce our decision regarding whether to revise the requirements for the importation of fragrant pears from China in a subsequent notice. If the overall conclusions of our analysis and the Administrator's determination of risk remain unchanged following our consideration of the comments, then we will revise the requirements for the importation of fragrant pears from China in accordance with this notice.
