**AGENCY:** Department of Energy (DOE).

**ACTION:** Floodplain and wetlands statement of findings.

**SUMMARY:** This is a Floodplain and Wetlands Statement of Findings for the Floodplain Strip Adjacent to the Boeing Property in Roane County, Tennessee, in accordance with 10 CFR 1022, Compliance with Floodplain/Wetlands Environmental Review Requirements. A floodplains and wetlands assessment was conducted and is included in an Environmental Assessment (EA) that evaluated the potential impacts of transfer from DOE ownership. **SUPPLEMENTARY INFORMATION:** A notice of Floodplain and Wetlands Involvement for the Floodplain Strip Adjacent to the Boeing Property was published in the **Federal Register** on May 3, 2000 (Volume 65, Number 86) and subsequently a floodplains and wetlands assessment was prepared and is included in an EA for divestiture of the Floodplain Strip from DOE ownership. The EA was prepared as part of National Environmental Policy Act (NEPA) requirements. The floodplain and wetlands assessment documented the floodplain and wetland communities on the Floodplain Strip, and assessed the potential impacts to floodplains and wetlands associated with conveyance of the 182-acre parcel. Alternatives considered include: (1) Conveyance of the Floodplain Strip to the abutting landowner for unrestricted use (the Preferred Alternative), (2) conveyance of the property to the Tennessee Valley Authority (TVA), (3) conveyance of the property to the City of Oak Ridge or Roane County, (4) DOE retention of ownership but with DOE granting easements to the abutting landowner, and (5) No Action. Any land conveyance would include land from the ordinary low water mark inward to the Boeing Property. The floodplains and wetlands assessment identified 69 acres of wetlands on the Floodplain Strip.

Some minor, short-term impacts could occur due to limited, proposed construction on the Floodplain Strip and potential development on the adjacent Boeing Property, which would primarily be associated with runoff and erosion of soil particles. Based on the limited planned improvements in the
