

to reduce the severity of injury from swings impacting people on their paths; this is added in section 5.3.8.

The Commission concludes that the suggested change from “belt seat” to “swing seats” would require additional changes throughout the Handbook to adequately address safety issues. For instance, the examples of age-appropriate equipment in Table 1 describe the appropriateness of belt swings; Table 7 describes minimum clearance dimensions for belt swings; and the use zone for belt swings is described in section 5.3.8.3.3. Removing specific recommendations for belt swings in section 5.3.8.3.1 would raise a question about the specific mention of belt swings in these sections. Generalizing the recommendations in these other sections is not always logical. Therefore, the change will not be made. The Commission also rejects the recommendation to allow general to-fro swing seats to be multi-user because section 5.3.8.3.1 addresses belt seats only, and belt seats can only accommodate a single user safely.

In addition, the Commission will maintain the current pivot point height recommendations for bucket seats to ensure toddlers are protected from potentially hazardous falls because caregivers are unlikely to distinguish full bucket seats intended for toddlers from full bucket seats intended for older pre-school age children.

The Commission agrees that small playgrounds with only a single swing bay may include different types of swings in the same bay with reduced risk, the corresponding change is made in section 5.3.8.3.2 to state that “when possible,” full bucket seat swings should be in separate structures or bays. Section 5.3.8.4 on multi-axis swings is also revised to include all types of multi-axis swings, including tire swings.
