\* The Standards Council of Canada (SCC) voted to end its Laboratory Accreditation Program for Substance Abuse (LAPSA) effective May 12, 1998. Laboratories certified through that program were accredited to conduct forensic urine drug testing as required by U.S. Department of Transportation (DOT) regulations. As of that date, the certification of those accredited Canadian laboratories continued under DOT authority. The responsibility for conducting quarterly performance testing plus periodic on-site inspections of those LAPSA-accredited laboratories was transferred to the U.S. HHS, with the HHS' NLCP contractor continuing to have an active role in the performance testing and laboratory inspection processes. Other Canadian laboratories wishing to be considered for the NLCP may apply directly to the NLCP contractor just as U.S. laboratories do.

Upon finding a Canadian laboratory to be qualified, HHS will recommend that DOT certify the laboratory as meeting the minimum standards of the current Mandatory Guidelines published in the **Federal Register**. After receiving DOT certification, the laboratory will be included in the monthly list of HHS-certified laboratories and participate in the NLCP certification maintenance program. DOT established this process in July 1996 (61 FR 37015) to allow foreign laboratories to participate in the DOT drug testing program.

**SUPPLEMENTARY INFORMATION:** In accordance with the PRA, as part of our continuing effort to reduce paperwork and respondent burdens, we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection

requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period on this information collection was published on November 12, 2024 (89 FR 89025). One comment was received from the Bureau of Economic Analysis supporting the collection of this data as nationally important. We are again soliciting comments on the proposed ICR that is described below. We are especially interested in public comments addressing the following issues:

(1) is the collection necessary to the proper functions of the USGS minerals information mission; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the USGS enhance the quality, utility, and clarity of the information to be collected; and (5) how might the USGS minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personally identifiable information (PII) in your comment, you should be aware that your entire comment—including your PII—may be made publicly available at any time. While you can ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

**Abstract:** Respondents will provide the USGS with domestic production and consumption data for 22 ores, concentrates, and metals, some of which are considered strategic and critical. This data will help determine national defense stockpile goals. USGC will collect this data through the use of on-line electronic and paper forms. These data and derived information will be published as chapters in minerals yearbooks, monthly mineral industry surveys, annual mineral commodity summaries, and special publications for use by government agencies, congressional offices, educational institutions, research organizations, financial institutions, consulting firms, industry, academia, and the general public.

We will add a currently OMB-exempt “Battery Recycling” (USGS Form 9–4147–A) canvass that will permanently exceed 9 potential respondents and convert to OMB-exempt status the
