

Based on the analysis contained herein of Anadarko's proposed survey activity described in its LOA application and the anticipated take of marine mammals, NMFS finds that small numbers of marine mammals will be taken relative to the affected species or stock sizes (*i.e.*, less than one-third of the best available abundance estimate) and therefore the taking is of no more than small numbers.

#### Authorization

NMFS has determined that the level of taking for this LOA request is consistent with the findings made for the total taking allowable under the incidental take regulations and that the amount of take authorized under the LOA is of no more than small numbers. Accordingly, we have issued an LOA to Anadarko authorizing the take of marine mammals incidental to its geophysical survey activity, as described above.

#### Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to the Revolution Wind Offshore Wind Energy Project Offshore of Rhode Island

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; modification of letter of authorization.

**SUMMARY:** In accordance with the Marine Mammal Protection Act (MMPA), as amended, its implementing regulations, and NMFS' MMPA Regulations for Taking Marine Mammals Incidental to Construction of the Revolution Wind Project Offshore of Rhode Island, notification is hereby given that upon request from Revolution Wind, LLC (Revolution Wind), NMFS has modified a Letter of Authorization (LOA) issued to Revolution Wind for the take of marine mammals incidental to activities associated with construction of the Revolution Wind Offshore Wind Energy Project (hereafter known as the "Project") in Federal and State waters offshore Rhode Island. Specifically, NMFS has removed the requirement that each real-time passive acoustic monitoring (PAM) data stream must be monitored by separate PAM operators. NMFS has determined that this modification to the aforementioned monitoring requirement does not change the findings made for the regulations and does not result in any change in the total estimated number of takes of marine mammals.
