DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-37,279]

Sterling Diagnostic Imaging, Inc., Now Known as Agfa Corporation, Brevard, North Carolina; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility To Apply for Worker Adjustment Assistance on March 22, 2000, applicable to workers of Sterling Diagnostic Imaging, Inc., Brevard, North Carolina. The notice was published in the **Federal Register** on April 21, 2000 (65 FR 21474).

At the request of the company, the Department reviewed the certification for workers of the subject firm. The workers are engaged in the production of medical X-ray film and the polyester base chemicals used in its manufacture. The company reports that in May, 1999, Agfa Corporation purchased Sterling Diagnostic Imaging, Inc. and became known as Agfa Corporation.

Information also shows that workers separated from employment at the subject firm, had their wages reported under a separate unemployment insurance (UI) tax account for Agfa Corporation.

Accordingly, the Department is amending the certification determination to properly reflect this matter.

The intent of the Department's certification is to include all workers of Sterling Diagnostic Imaging, Inc., now known as Agfa Corporation who were adversely affected by increased imports.

The amended notice applicable to TA-W-37,279 is hereby issued as follows:

All workers of Sterling Diagnostic Imaging, Inc., now known as Agfa Corporation, Brevard, North Carolina who became totally or partially separated from employment on or after January 6, 1999, through March 22, 2002, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 8th day of August, 2001.

Linda G. Poole,

Certifying Officer, Division of Trade Adjustment Assistance.

Waukesha Cherry-Burrell Louisville, Kentucky; Notice of Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on July 30, 2001, in response to a petition filed by a company official on behalf of workers at Waukesha Cherry-Burrell, Louisville, Kentucky.

The official submitting the petition has decided to withdraw it. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed in Washington, D.C. this 8th day of August, 2001.

Linda G. Poole,

Certifying Officer, Division of Trade Adjustment Assistance.

DV & P, Inc., New York, New York; Notice of Termination and Investigation

Pursuant to Title V of the North American Free Trade Agreement Implementation Act (Pub. L. 103-182) concerning transitional adjustment assistance, hereinafter called (NAFTA-TAA), and in accordance with Section 250(a), Subchapter D, Chapter 2, Title II, of the Trade Act of 1974, as amended (19 U.S.C. 2273), an investigation was initiated on July 2, 2001 in response to a petition filed on behalf of workers at DV & P, Inc., New York, New York.

The petitioners requested that the petition for NAFTA-TAA be withdrawn. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, D.C., this 7th day of August, 2001.

BILLING CODE 7036-01-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-237 and 50-249]

Exelon Generation Company, LLC; Notice of Consideration of Issuance of Amendment To Facility Operating License and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. DPR-19 and DPR-25, issued to Exelon Generation Company, LLC (EGC, or the licensee), for the operation of Dresden Nuclear Power Station, Units 2 and 3, respectively, located in Grundy County, Illinois.

The proposed amendment, requested by application dated September 29, 2000, as supplemented by letters dated March 1 and August 13, 2001, would change the Technical Specifications (TS) to support a change in fuel vendors from Siemens Power Corporation to General Electric (GE) and a transition to the use of GE-14 fuel. The March 1 and August 13, 2001, supplements each increased the scope of the September 29, 2000, application. The March 1, 2001, supplement increased the scope of the proposed amendment by requesting TS changes to (1) Increase the number of required automatic depressurization

system (ADS) valves from four to five, (2) add surveillance requirements for the operability of the additional ADS valve, (3) change a surveillance requirement to verify the flow rate of two low-pressure coolant injection pumps instead of three pumps, consistent with the accident analyses, and (4) remove an allowance to continue operating for 72 hours if certain combinations of emergency core cooling system (ECCS) systems are inoperable. The August 13, 2001, supplement further increased the scope of the proposed amendment by requesting changes to the TS allowable values for two ECCS functions, the containment spray time delay and the low-pressure coolant injection time delay. All of these changes support the transition to the use of GE-14 fuel. The changes proposed by the application dated September 29, 2000, were noticed in the **Federal Register** on December 27, 2000 (65 FR 81908).

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. For the changes requested by letter dated March 1, 2001, related to the ADS system and the ECCS surveillances, the licensee provided the following analysis of the issue of no significant hazards consideration:

1. The proposed TS changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes do not affect the initiators of analyzed events or the assumed mitigation of accident or transient events. Analyzed events are initiated by the failure of plant structures, systems or components. The proposed changes do not impact the condition or performance of these structures, systems or components. Consequences of analyzed events are the result of the plant being operated within assumed parameters at the onset of any events. The evaluations supporting the transition to GE fuel revealed
