

rules may provide for the equitable allocation of reasonable dues, fees, and other charges among its members and other persons using its facilities. The proposed change is reasonable because it will allow LMMs greater access to marketing fee funds. The proposed change is equitable and not unfairly discriminatory because it is designed to allow LMMs to encourage greater order flow to be sent to the Exchange. A LMM could be able to amass a greater pool of funds with which to use to incent order flow providers to send order flow to the Exchange. This increased order flow would benefit all market participants on the Exchange. Further, allowing additional LMMs to access marketing fee funds generated from a Directed Order would provide LMMs with an incentive to encourage the routing of order flow into classes in which the LMM otherwise would not.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change would place the Exchange on equal footing as other exchanges that allow their LMM equivalents to be allocated marketing fees generated by Directed Orders. The Exchange believes that such an even playing field will promote competition among options exchanges. The Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues who offer similar fee structures. Many competing venues offer similar fee structures to market participants. To this end, the Exchange is proposing a market enhancement to encourage market participants to trade on the Exchange. The Exchange believes the proposed rule change is procompetitive because it would enable the Exchange to provide member organizations with a fee structure that is similar to that of other exchanges.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments were neither solicited nor received.

Background

The FAA's System Wide Information Management (SWIM) program is one of seven transformational programs of the NextGen portfolio. SWIM utilizes a Service Oriented Architecture (SOA) to exchange aviation data and services without the restrictive, time consuming and expensive process of developing unique interfaces for the multitude of systems and equipment used by the National Airspace System (NAS).

The Aircraft Access to SWIM (AAtS) initiative provides a global extension of the NAS SOA to aircraft using air to ground network services, selected and funded by aircraft operators, exchanging data between aircraft and the NAS. The AAtS capabilities established in Phase 1 are significant in that near real-time
