

**Needs and Uses:** The information collection activity will garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or change in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management. Feedback collected under this generic clearance will provide useful information, but it will not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods of assessing potential nonresponse bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

**OMB Control Number:** 3060–1270.

**Title:** Protecting National Security Through FCC Programs.

**Form Number:** N/A.

**Type of Review:** Extension of a currently approved collection.

**Respondents:** Business or other for-profit.

**Number of Respondents and Responses:** 2,257 respondents; 2,257 responses.

**Estimated Time per Response:** 3 hours.

**Frequency of Response:** One-time reporting requirement.

**Obligation to Respond:** Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 1.4(b)(1), 1.103(a), 151–154, 201(b), 229, 254, and 1004.

**Total Annual Burden:** 6,771 hours.

**Total Annual Cost:** No Cost.

**Privacy Act Impact Assessment:** No impact(s).

**Nature and Extent of Confidentiality:**

The Commission will consider the potential confidentiality of any information submitted, particularly where public release of such information could raise security concerns (e.g., granular location information). We expect, however, that the public interest in knowing whether a carrier uses or owns equipment or services from Huawei or ZTE would significantly outweigh any interest the carrier would have in keeping such information confidential. Respondents may request materials or information submitted to the Commission or to the Universal Service Administrative Company be withheld from public inspection under 47 CFR 0.459 of the Commission's rules.

**Needs and Uses:** The Commission will submit this information collection to the Office of Management and Budget (OMB) as an extension during this comment period to obtain the full three-year clearance from OMB. Under this information collection, the Commission proposes to collect information to determine the extent to which potentially prohibited equipment exists in current networks and the costs associated with removing such equipment and replacing it with equivalent equipment. The Communications Act of 1934, as amended, requires the "preservation and advancement of universal service." 47 U.S.C. 254(b). The information collection requirements reported under this collection are the result of Commission actions to promote the Act's universal service goals. On November 22, 2019, the Commission adopted a Report and Order, Further Notice of Proposed Rulemaking, and Order, WC Docket No. 18–89, FCC 19–121 (*Protecting Against National Security Threats to the Communications Supply Chain Through FCC Programs*). The Report and Order prohibits future use of Universal Service Fund (USF) monies to purchase, maintain, improve, modify, obtain, or otherwise support any equipment or services produced or provided by a company that poses a national security threat to the integrity of communications networks or the

communications supply chain. It also initially designated two entities—Huawei Technologies Company (Huawei) and ZTE Corporation (ZTE), along with their affiliates, subsidiaries, and parents—as covered companies posing such a national security threat. In the *Further Notice*, the Commission proposed to make the requirement to remove covered equipment and services from carriers' networks contingent on the availability of a funded reimbursement program, in an effort to mitigate the impact on affected entities. This information collection is designed to collect data from eligible telecommunication carriers (ETCs) and other carriers to determine the extent of which potentially prohibited equipment exists in current networks and the costs associated with removing such equipment and replacing it with equivalent equipment. The data will aid the Commission's review of the record and guide our next steps in this proceeding.

Federal Communications Commission.

## GENERAL SERVICES ADMINISTRATION

[OMB Control No. 3090–00XX; Docket No. 2020–0001; Sequence No. 2]

### Information Collection; Technology Transformation Services—Candidate Experience Surveys

**AGENCY:** Technology Transformation Services (TTS), Federal Acquisition Service (FAS), General Services Administration (GSA).

**ACTION:** Notice of request for comments regarding a new information collection.

**SUMMARY:** Under the provisions of the Paperwork Reduction Act, the Regulatory Secretariat Division will be submitting to the Office of Management and Budget (OMB) a request to review and approve a new information collection requirement regarding sending candidate surveys to all applicants who apply to jobs within the Technology Transformation Services (TTS).

**DATES:** Submit comments on or before July 28, 2020.

**ADDRESSES:** Submit comments identified by Information Collection 3090–00xx; Technology Transformation Services—Candidate Experience Surveys, by any of the following methods:

*Regulations.gov*: <http://www.regulations.gov>. Submit comments via the Federal eRulemaking portal by searching for the OMB Control number 3090–00xx. Select the link “Comment Now” that corresponds with “Information Collection 3090–00xx; Technology Transformation Services—Candidate Experience Surveys”. Follow the instructions on the screen. Please include your name, company name (if any), and “Information Collection 3090–00xx; Technology Transformation Services—Candidate Experience Surveys” on your attached document. If your comment cannot be submitted using <https://www.regulations.gov>, call or email the points of contact in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

**Instructions:** Please submit comments only and cite Information Collection 3090–00xx; subject, in all correspondence related to this collection. Comments received generally will be posted without change to <http://www.regulations.gov>, including any personal and/or business confidential information provided. To confirm receipt of your comment(s), please check [www.regulations.gov](http://www.regulations.gov), approximately two-to-three days after submission to verify posting (except allow 30 days for posting of comments submitted by mail).

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information should be directed to Jennifer Moran, Technology Transformation Services, via email to [jennifer.moran@gsa.gov](mailto:jennifer.moran@gsa.gov), or via phone 202–213–1262.

**SUPPLEMENTARY INFORMATION:**

**A. Purpose**

The goal of TTS is to modernize the way the government uses technology by applying modern methodologies and technologies to improve the public’s experience with government. In order to accomplish this, we need to be able to attract top technical talent from across the country. This often means competing for talent with the private sector, where companies can often offer more robust compensation and benefits.

In order to remain competitive, it is vital that we provide an exceptional candidate experience and maintain a strong brand reputation. Some of the ways we strive to do this is through providing clear job descriptions, thorough interview preparation and personalized candidate experience throughout the process. In doing so, we are better able to recruit more candidates into doing a tour of duty in the government. Candidate Surveys are a way for us to continuously measure

how we are doing and make any necessary improvements to our hiring process so we can continue to hire and attract the top talent we need at the rate we need them in this demanding market.

By consistently asking applicants and candidates for their feedback and reviewing the survey results, we can pinpoint what areas in our process need to be modified, changed, removed, and/or added. Surveys allow respondents to remain anonymous and will be sent out three times during the hiring process:

- After a candidate applies to a role. Data at this stage will help us understand if our job descriptions provide a clear understanding of the roles and responsibilities that we are hiring for. It will also help us understand if our website has thorough enough information about the overall hiring process or if there are more resources that we can be providing.
- After a candidate interviews. Data at this stage will help us understand if we are properly preparing candidates and interviewers for interviews.
- When the candidate is Selected or Not Selected after the Interview. Data at this stage will help us understand what the candidate’s experience was with their TTS recruiter overall and if there is anything they think we can improve upon.

**B. Annual Reporting Burden**

*Respondents:* 7,400.  
*Responses per Respondent:* 1–3.  
*Total annual responses:* 1,110.  
*Hours per Response:* 5 minutes per survey.

*Total Burden Hours:* 15 minutes for candidates who complete all 3 surveys.

**C. Public Comments**

Public comments are particularly invited on: Whether this collection of information is necessary, whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

**Obtaining Copies of Proposals:** Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW, Washington, DC 20405. ATTN: Information Collection

3090–00xx; Technology Transformation Services—Candidate Experience Surveys. Please cite OMB Control No. 3090–00xx, Technology Transformation Services—Candidate Experience Surveys, in all correspondence.
