

experimental data to support the experimental hypothesis. Specifically:

1. ORI found falsified and/or fabricated data in Paper 1 in:
- a. Figure 5B by manipulation of the HER3 protein concentrations in the experiment to provide the desired outcome
- b. Figure 6C for the identification of the kinase domain construct EGFR–V924R by falsely claiming that both EGFR and HER3 contained the kinase domains and the full JM segments, when the JM–HER3 construct included cloning tags
- c. Figure 6D by manually manipulating the error bars to increase statistical significance of the kinase assay
2. ORI found falsified and/or fabricated data in Paper 2 in:
- a. Figure 3C by manually altering some of the data points by 10–20% support the desired hypothesis
- b. Figure 4A by manipulating data points and reducing error bars and failing to report that JM–HER3 construct had cloning tags
- c. Figure 4B by reducing several data points by ~ 15%
