

PHMSA requests comment on the following questions to assist in our evaluation of the proposed research and development with a scope as specified above.

1. Would the results from the proposed testing adequately inform design specifications for vent systems?

2. Is the number of COPV tubes in the above test matrix adequate for a representative test of the COPV, or should additional COPV tubes be tested to ensure replicability?

3. Is a bonfire test of at least 30 minutes sufficient to test activation of the PRDs? If not, what would be a sufficient minimum duration to test PRD activation?

4. Should a minimum bonfire temperature be specified to test PRD activation? If so, what should the minimum bonfire temperature be?

5. Is the number of bonfire tests (one for each configuration) sufficient to test PRD effectiveness? If not, how many replicates of the test should be conducted?

6. Would testing at 6" and 10" away from the center of the fire be sufficient to capture differences in fire location from the PRDs? If not, what fire distances/locations are recommended?

7. Should different operating pressures be tested? If so, what other pressures should be tested?

8. Do the proposed COPV/PRD combinations provide an accurate comparison of temperature/pressure-activated PRDs to temperature-activated PRDs? If not, which COPV/PRD

combinations should also be considered in addition to the above testing matrix?

9. What other variables, if any, should be included in testing?

10. Are there other existing safety concerns about COPVs and PRDs that PHMSA should be aware of?

11. What, if any, are the cost impacts of using CG-9 or CG-10 PRDs on COPVs instead of CG-4 or CG-5?

12. How common is the current use of CG-9 or CG-10 PRDs for COPVs used to transport flammable gases?

13. Should the allowable PRDs for COPVs used to transport flammable gases be limited to CG-9 or CG-10?

Issued in Washington, DC, on March 14, 2025.

Director, Operations System Division, Office of Hazardous Materials Safety, Pipeline and Hazardous Materials Safety Administration.
