

marketing facilities. Livestock marketing facilities are able to enter into approved livestock facility agreements that include animal identification information requirements, timely notifications, recordkeeping, and other actions that facilitate tracking animal movements and identifying possible disease occurrences. APHIS requires all slaughtering and rendering establishments that receive livestock and poultry through interstate movement to enter into listing agreements that permit the Agency to conduct blood and tissue sampling at the facilities. The agreements are critical during disease outbreaks as they reduce delays in assessments and, subsequently, disease spread.

The information collection requirements above are currently approved by the Office of Management and Budget (OMB) under OMB control numbers 0579–0212 (Blood and Tissue Collection at Slaughtering and Rendering Establishments) and 0579–0258 (Interstate Movement of Sheep and Goats; Recordkeeping for Approved Livestock Marketing Facilities and Slaughtering and Rendering Establishments). After OMB approves this combined information collection package (0579–0212), APHIS will retire OMB control number 0579–0258. Also, as a result of the aforementioned merging of information collection packages, APHIS has revised the name of this information collection from “Blood and Tissue Collection at Slaughtering and Rendering Establishments” to “Blood and Tissue Collection and Recordkeeping at Slaughtering, Rendering, and Approved Livestock Marketing Establishments and Facilities”.

We are asking OMB to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as

appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of Burden: The public reporting burden for this collection of information is estimated to average 0.176 hours per response.

Respondents: State health authorities; accredited veterinarians; and owners, operators, and recordkeepers for slaughter and rendering establishments, and livestock marketing facilities.

Estimated Annual Number of Respondents: 2,864.

Estimated Annual Number of Responses per Respondent: 5.

Estimated Annual Number of Responses: 14,010.

Estimated Total Annual Burden on Respondents: 2,471 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, on July 10, 2017.

Michael C. Gregoire,

Acting Administrator, Animal and Plant Health Inspection Service.
